SINGING ROCK COMPANY

We are climbers who work for climbers

We put not only our experience, but also our enthusiasm into our professional equipment. We proudly do it in Czechia.

We are here for those who want to see the vertical world as it is, without pretence and unrealistic ballast. We do not embellish or hide anything.

We respect the purity of of work at height and that's how we approach our products.

We offer solutions

Climbers for climbers

and we talk to them accordingly. We make our professional equipment as if we were making it for ourselves.

We understand the world of our customers

We always look for an ideal and complex solution of a product, situation or communication, so that our customers are satisfied.

SINGING ROCK VALUES

We are climbers who work for climbers

Pure experience

It is a part of our products and manner of communication. We share it with every interaction.

Functionality The value of real workers at height who don't need fancy and glitz. They are self-confident and rely on the equipment they use.

MISSION

We make products for your vertical world.

We bring simplicity, authenticity and fair behaviour to climbing and working at heights.

MILESTONES

read more about our history From **TUCAN** to **SINGING ROCK**. From "**Tatrman**" to the "**Arrow**". From one sewing machine and 40 m2 of a workshop at home to three manufacturing plants and more than 170 employees. These and more are the milestones of SINGING ROCK.

1992	1995	2000	2001	2003
Foundation of SINGING ROCK by two professional climbers	SINGING ROCK enters the work at height segment, complementing its outdoor climbing business	QMS certification according to ISO 9001 (and Art. 11B of Council Directive 89/686/EEC) Investment into own factory in Poniklá	Redesign corporate image Launch of in-house developed dynamic and static ropes	Launch of own designed line of carabiners and other hardware
2005	2008	2009	2011	2013
Introduction of POLYGONbrand and opening of the first centerin Poniklá	Acquisition of	Merger with LANEX Investment in a second training center in Kladno Acquisition of new production space for textile production in Semily	CRAVELTIK Acquisition of Raveltik, incorporating capabilities in the hardware segment and expanded coverage of the mountaineering and ice climbing segments	POLYGON's training centers in Poniklá and Kladno become certified by IRATA Spin-off from LANEX and reorganization as an independent entity
2015	2017	2019	2020	2022

PRODUCTION & QUALITY CONTROL

Although we are open to the world, the heart of SINGING ROCK beats in the Czech Republic. The headquarter, production, training and testing centre is located in Poniklá. Our textile production plant is situated in Semily. The production of metal products and components is placed in Sudkov. The Kladno training centre for work at height is just 20 min from Prague. Four locations in the Czech Republic, including three manufacturing plants and two training centres bring you the equipment and services for your vertical playground.

DISTRIBUTION

Singing Rock supplies products to more than 65 countries worldwide, through its network of distributors and agents. Thanks to them, you can find us wherever they understand climbing and working at heights.

DISTRIBUTION

KNOWLEDGE & EXPERIENCE

Meeting minimum requirements is obvious. We go further by performing the tests to simulate all kind of usage as the basis for our further development. In our laboratory we can test our products on several testing machines f.e. a helmet testing machine or cycling hydraulic machine for fatigue tests of movable components and elastic webbings. Laboratory tests are, of course, complemented by testing and validation in the real environment.

RESEARCH & DEVELOPMENT

For more than 30 years, SINGING ROCK has built on its experience and knowledge in designing and manufacturing products for your vertical world. Developing our products requires expertise in a wide range of different materials and manufacturing technologies. Modern tools help our development team to create products to your and our satisfaction.

EFFICIENCY

We run lean management system with horizontal organisation structure. Thanks to this structure we are able to react immediately and customize our products and service for your specific needs.

SUSTAINABILITY

We bear the responsibility to keep our planet green and to preserve its riches for our kids. Singing Rock is supporting by its membership in the European Outdoor Conservaton Association environmental activities all around the world.

HARNESSEG

ROPE ACCESS FALL ARREST FULL BODY CHEST SIT HARNESSES ARBORICULTURE RESCUE ACCESSORIES

SPEED BUCKLE

Fast donning and adjustment

Singing Rock SPEED buckle is the side quick release buckle for easy operation with the harness. SPEED buckle enable fluent and fast adjustment to fit a user's body. The buckle is very durable, made of steel and matches the strict American standard ANSI. The buckle is impossible to open under the loading, also is impossible to lock when the webbing is twisted. Comes in two sizes with a strength 18 kN.

EASY-LOCK BUCKLE

Unique buckle with a sliding captive bar matches strict American standards (ANSI, CSA). Its minimum strength is 17.2 kN. No webbing slippage in a buckle. Its construction ensures longtime operation and efficiency (easy releasing and fastening even when dirty and tough webbing). Corrosion resistance is tested by spraying in a salty chamber for a period of 48 hours.

ROCK & LOCK

patented smart buckle system

Easy to lock and open: Only a small amount of finger pressure is needed to lock and to open.

- Fast lace-through: Make the loop, put it through the buckle frame, hook the loop on the cross bar and tighten. It's as easy as that.
- Smart function: Rock&Lock allows you to put on your harness very quickly
- Double safety: Webbing cannot slip through Rock&Lock due to a safety loop at the end of the webbing Spontaneous opening of Rock&Lock is virtually impossible.
- Lightweight and extra strong.
- Excellent operation in all-season conditions: Operation guaranteed even when webbing is wet or frozen.

black version - W0079DB

W0079DR

EXPERT 3D / SPEED

Fully adjustable harness for a rope access with wide padded waist belt, leg loops and shoulder straps. Suitable also for work positioning, fall arrest and work restraint situations.

- shoulder straps can be totally removed and the harness can be used as a sit harness only
- super comfortable wide waist belt padding provides maximum comfort when working at height
- strength webbing on the waist belt is stitched in the way that at normal working situation the body weight is absorbed by the padding only
- reflective strap and printing on the waist belt and shoulder padding increase the visibility in dark working conditions
- anatomic leg loops and waist belt are covered with strong PES fabric providing high abrasion resistance
- SPEED buckles enable fluent and fast adjustment to fit a user's body
- OXY triple lock carabiner used for connection of shoulder straps to the main point to increase the space for chest ascender attachment
- chest ascender smart fixation system with plastic cover on the OXY carabiner increasing the durability of the webbing
- shoulders straps and leg loops are independently adjustable
- narrowed padding and webbing on the shoulder straps in a neck area enhance a comfortable work
- front and back attachment points for fall-arrest according to EN 361 marked with additional "A" marking
- rear lower attachment point according to EN 813
- flat rear attachment point does not bear on users back when carrying backpack or breathing apparatus
- front lower attachment point for descender placement or work positioning according to EN 813, EN 358
- 2 side attachment points for work positioning according to EN 358
- heavier items up to 35 kg can be attached to the webbing on the waist belt
- all steel components finished with E coating for higher corrosion resistance
- 4 ergonomic braided gear loops with a bearing capacity 15 kg
- additional loops on the waist belt and leg loops with a bearing capacity of 5 kg offer additional space for the gear and better gear orientation
- wide elastic band on left shoulder strap for the gear attachment (f.e. transmitter)
- · slots on the waist belt for PORTER tool holder to carry your industrial tools

WIND MASTER

NEW

Work harness that you can use not only for the maintenance of wind turbines. It is also suitable for work at height and service activities in telecommunications or the construction industry. WIND MASTER has a lot of features, but its main extras are the waist belt with the plastic back cover equipped with the durable glides and the front EN 361 LADDER CONNECTION POINT.

- harness is equipped with classic EN 361 front and rear attachment points for fall arrest; the rear point is recessed into the padding so it does not impede movement in confined spaces when not in use
- in addition, there is the specific EN 361 LADDER CONNECTION POINT on the front under the chest for connection to EN 353-1 fall arrest systems, which allows freer movement on secured ladders and structures
- if a fall is caught by the LADDER CONNECTION POINT, the auxiliary seams are ripped out and the point changes its position so that the user is not in danger of being turned head down
- wide waist belt with the plastic back cover equipped with the durable glides ensures comfortable movement and rest on fall arrest systems even in confined spaces
- shoulders have removable loops in the front for parking shock absorber hooks when they
 are not in use; under heavier loads, the loop is released so that a shock absorber can be
 safely deployed in the event of a fall
- upper parts of the shoulders have EN 1497 textile loops for pulling the user out in case of rescue from a confined space
- EN 813/EN 358 front attachment point located in the front serves for resting, lowering and work positioning
- additional work positioning options are offered by the two EN 358 swing-out attachment points on the sides of the waist belt
- SPEED buckles on the leg loops and at the waist ensure smooth and quick putting on of the harness, leaving more time for efficient work
- padding on the leg loops and shoulder straps evenly distributes the user's weight and thus
 reduces strain and fatigue
- waist belt is equipped with two standard textile loops with a load capacity of 5 kg, so the necessary equipment is always at hand
- steel buckles are E-coated for increased corrosion resistance in wet and salty environments
- using an additional carabiner, the CAM CLEAN chest ascender can be attached to the harness
- whether you're an experienced wind power technician or a newcomer to the industry, WIND MASTER guarantees you first-class comfort and functionality

Size: S, M/L, XL Weight: 2400 g (M/L) • 85 oz (M/L) Max. rated load: 150 kg C€1019 • EN 358 • EN 813 • EN 361 • EN 1497

W0091BY

ROOF MASTER

You want freedom of movement when working on the roof, and the ROOF MASTER harness with its many features and unique Singing Rock MOTION SYSTEM guarantees it. Its movable attachment point is openable, which makes it easy to connect a chest ascender or detach the shoulder straps. So, you can choose between a full-body and a sit harness, it's up to you.

- Singing Rock MOTION SYSTEM guarantees freedom of movement without being restricted by a working rope or a fall arrest system
- in the front, part of the MOTION SYSTEM is the light alloy RINGO ring which forms a movable attachment point and a flexible connection between the waist belt and shoulder straps
- RINGO ring is openable, which allows easy attachment of the CAM CLEAN chest ascender or detachment of the shoulder straps and conversion of the full-body harness into the sit harness
- on the back of the harness, the MOTION SYSTEM consists of a classic light alloy ring that works as a flexible connection between the dorsal strap and the back of the waist belt
- this rear light alloy ring is equipped with a grey textile loop with a capacity of 100 kg for heavier work tools
- in the back of the shoulder straps there is a red EN 361 textile attachment point for fall arrest
- front EN 361 fall arrest point (the red light alloy D-ring) is positioned lower than usual and takes full advantages of the front part of the MOTION SYSTEM
- MOTION SYSTEM allows to use this point also for work positioning without restricting the user's movement or work - thus one point serves both for fall arrest and positioning at the same time
- red D-ring can also be used as EN 813 because it functions as an extension of the front attachment point
- SPEED buckles on the leg loops and on the left side of the waist belt ensure easy adjustment and comfortable putting on of the harness
- side textile EN 358 loops for work positioning are highlighted with red stitching and designed to prevent accidental catching during work
- 3D waist belt is equipped with a rubberized strength fabric with a number of attachment holes - you can thread an auxiliary cord through the holes to create additional loops or you can clip auxiliary carabiners into the holes to connect a tool bag (each hole has a bearing capacity of 10 kg)
- waist belt is also equipped with two standard textile loops with a bearing capacity of 5 kg
- ring-shaped leg loops are lightweight, yet very comfortable, their size can be easily adjusted with SPEED buckles, they are connected to the waist belt at the back by adjustable elastic straps
- neoprene pocket on the right leg loop is suitable for small items
- reflective printing on the waist belt increases the visibility of the harness
- identification label on the back of the shoulder straps ensures that you can always find yours in a pile of harnesses

Weight: (M/L) 1830 g • 64.55 oz Max. rated load: 150 kg Size: S, M/L, XL C€ 1019 • EN 358 • EN 813 • EN 361

TACTIC MASTER

Lightweight and fully adjustable fullbody safety harness intended mainly for special forces featuring the MOLLE system and a possibility to wear the harness above the bullet-proof vest. The unique Singing Rock MOTION SYSTEM with the openable RINGO O-ring gives the user freedom of movement without being restricted by a working rope or a fall arrest system. An ideal solution for working at heights where the precise positioning and free movement are important.

- frontal textile A point according to EN 361 is vertically adjustable, allowing to use the same harness with and without the bullet-proof vest
- abseil rope clipped through a connector, attached to A point, can help the user to stay in an upright position even with a heavy load on the back
- part of the EN 813 MOTION SYSTEM is the openable RINGO O-ring, which allows the user to disconnect the chest part and leg loops or put the chest ascender along with other devices directly to RINGO
- shoulder straps and leg loops are fully removable, the harness can be used as a sit harness or positioning (tactical) belt only
- textile loops for work positioning according to EN 358 designed in a way that prevents accidental capture during a work
- during the fall arrest to the dorsal textile attachment point EN 361, the MOTION SYSTEM efficiently splits the energy of the fall to the harness
- harness can be easily supplemented with the CAM CLEAN chest ascender
- shoulder connection for confined space rescue
- MOLLE system on the waist belt, leg loops and right shoulder strap to attach the pouch
 or other gear
- speed buckles for quick and easy put on /off
- rear light alloy ring is equipped with grey textile loop for heavier tools with a load capacity 100 kg

Size: S, M/L, XL Weight: (M/L) 1740 g • 61.38 oz Max. rated load: 150 kg C€ 1019 • EN 358 • EN 813 • EN 361 • EN 1497

Harnesses

SEAMASTER 3D STAINLESS STEEL

Fully adjustable harness for rope access with a padded wide waist belt, leg loops and shoulder straps. Suitable for work positioning, fall arrest and work restraint situations.

This harness is specially intended for workers at offshore oil platforms.

- stainless steel components make the harness ultimate choice for offshore operations
- padded waist belt, shoulder straps and leg loops
- wide waist belt provides maximum comfort when working at height
- narrowed padding and webbing on the shoulder straps in a neck area enhance comfortable work
- reflective printing on the waist belt increases the visibility in dark working conditions
- front attachment point for fall-arrest according to EN 361
- front lower attachment point for descender placement or work positioning according to EN 813
- side attachment points for work positioning according to EN 358
- 3 braided gear loops with a bearing capacity of 5 kg

- heavier items up to 35 kg can be attached to the webbing on the waist belt
- additional loops with a bearing capacity of 5 kg offer additional space for the gear and better gear orientation
- combination of standard and SPEED buckles enable fluent and fast adjustment to fit the users body
- special construction of central loop provides excellent comfort when hanging in the harness
- easy fixing CAM CLEAN ascender in vertical position is provided by stitched strap between lower front attachment point and front tie-in point
- different color webbing stitched in the buckle simplifies adjusting and size selection

Weight: (M/L) 1870 g • 66 oz Max. rated load: 150 kg Size: S, M/L, XL C€1019 • EN 361 • EN 358 • EN 813

W0086B0

ANTISHOCK I

Full body harness for rope access, work positioning, fall arrest. The Antishock I is the perfect solution for work at height in explosive atmospheres. It is particularly suitable for energetics, petrochemical and mining environments.

- all metal and alloy parts are overmolded with colored plastic with an electrical puncture resistance of 10 kV and antistatic finishing
- harness certified according to the newest North American standards ANSI Z359.11-2014 and NFPA 1983 Class II
- ergonomic and removable lanyard keepers on the shoulder straps allow user to store lanyard connectors when not in use - in the event of a fall, the connector is released so that the shock absorber can be safely deployed
- for easier inspection, the harness is equipped with fall indicators placed close to dorsal attachment point which are activated in case of a fall – red label indicates that the harness must be retired
- shoulder attachment points for confined space rescue according to EN 1497 2

- side attachment points for work positioning according to EN 358
- front lower attachment point for descender placement or work positioning according to EN 813
- narrowed padding and webbing on the shoulder straps in a neck area enhance a comfortable work
- chest ascender smart fixation system
- chest ascender maillon slot (recommended maillon big D, EN 362)
- 2 large braided gear loops with a bearing capacity of 5 kg
- name tag for easier recognition of the harness

Size: S, M/L, XL

Weight: (M/L) 2430 g • 85.72 oz Max. rated load: 150 kg (140 kg/310 lbs according to ANSI) ANSI Z359.11-2014 • NFPA 1983 Class III • C€ 1019 • EN 358 • EN 813 • EN 361 • EN 1497

W0059BR

TARZAN ECONOMIC

Fully adjustable full body harness intended for rope courses and adventure parks.

- front attachment point for belaying and rappeling according to EN 12277 type C
- waist belt and leg loops without the padding enables to put a harness to every person
- rear steel D-ring with a bearing capacity of 15 kN according EN 361
- shoulder straps, waist belt and leg loops are easily adjustable with Easy Lock buckles
- all steel components are finished with E coating technology for higher corrosion resistance
- left leg loop with red colour helps to put the harness on
- webbing strap stitched in the buckle simplify handling with a buckle
- dorsal plastic plate with different color according the size of the harness (S – yellow, UNI – red)

Size: S (110 – 150 cm), UNI (150 – 200 cm) Weight: 1050 g • 34 oz (UNI) C€1019 • EN 12277 • EN 361

WUU8/BY

ROPEDANCER II

Fully adjustable full body harness with various attachment points intended for rope courses and adventure parks

- easy to put on and off,
- easy to adjust, thanks to 5 double buckles and 1 SPEED buckle
- bright color font lower attachment point for rappelling and belaying •waist belt in different (black) color for better orientation within the harness
- front and rear attachment points
- 2 gear loops with a bearing capacity of 5 kg
- max. rated load of the harness 150 kg
- different color of the rear triangle for each size
- suitable also for working at height

Weight: (S/M/L) 1195g • 42.15 oz c € 1019 • EN 12277

FALL ARREST

W0068BR black version – W0068BB

BODY II STANDARD

BODY II SPEED

Fully adjustable fall-arrest harness with various attachment points.

- two fall-arrest attachment points according to EN 361
- harness is compact and light-weight, thus suitable for horizontal or inclined space. It also allows temporary hanging in.
- intended for working in places with the risk of fall
- flat rear attachment point does not affect comfort when wearing the backpack or breathing apparatus
- shoulder and leg loops webbings are colour distinguished for easy manipulation
- webbing stitched in the buckle simplify handling
- two gear loops with max. load 5 kg
- easy to adjust, easy to put on and off
- suitable also for rope courses and adventure parks
- different colour of rear triangle for each size (S/M/L- grey, XL/XXL- yellow)
- 2 sizes fit whole size range from 150 to 210 cm

Size: S/M/L, XL/XXL, XXXL Weight: 1025 g • 36.16 oz (size S/M/L) C€1019 • EN 361

W0093SY

BODY II ENERGY SPEED

Fully adjustable work-positioning harness with various attachment points, speed buckles and comfortable padding.

- suitable for working situations whith maximum freedom of movement during work positioning
- stitched waist belt padding allows horizontal or vertical movement of the padding thus providing maximum comfort during a work.
- side attachment points for work positioning according EN 358
- front and rear attachment points according EN 361 marked with "A" label
- removable and washable shoulder and leg loops padding provides great comfort
- shoulder padding with reflective straps and integrated loops for hooks storage
- webbing stitched in the buckles simplify handling
- two gear loops with max. load 5 kg
- 4 additional plastic hooks for light gear attachment
- 3 sizes fit whole size range from 150 to 210 cm

Size: S/M/L, XL/XXL, XXXL Weight: 2250 g • 79.44 oz (size S/M/L) C€ 1019 • EN 361 • EN 358

BASIC LIGHT

Fully adjustable fall-arrest harness with a rear dorsal attachment point.

- dorsal rear D-ring attachment point according to EN 361
- one gear loop with max load of 5 kg
 easy to adjust thanks to 4 easy-lock buckles, easy to put on and off
- different color of the rear webbing for each size (S/M/L grey, XL/XXL yellow)
- all steel components finished with E-coating for higher corrosion resistance
- 2 sizes fit whole size range from 150 to 210 cm
- suitable for use with a range of accessories like Pole, Harness Padding, Suspension Trauma Safety Strap

Size: S/M/L, XL/XXL Weight: 760g • 26.81 oz / 810g • 28.5 oz C € 1019 • EN 361

BASIC

Fully adjustable fall-arrest harness with rear dorsal and front sternum attachment points.

- dorsal rear D-ring and front textile twin loops attachment points according to EN 361
- one gear loop with max load of 5 kg
- easy to adjust thanks to 4 easy-lock buckles, easy to put on and off
- different color of the rear webbing for each size (S/M/L grey, XL/XXL yellow)
- all steel components finished with E-coating for higher corrosion resistance
- 2 sizes fit whole size range from 150 to 210 cm
- suitable for use with a range of accessories like Pole, Harness Padding, Suspension Trauma Safety Strap

POLE II

Belt for work positioning and prevention against the falls from a height.

- anatomic padded waist belt ensures minimal bruising and enough comfort in the waist area
- two side "D" ring for work positioning according to EN 358, tested for 15 kN strength
- two braided gear loops with a bearing capacity of 5 kg
- slots designed for a secure hanging of expensive equipment (such as power saw, drilling machine,...) with a capacity of 1 kN
- speed buckles allow easy manipulation when dressing up and undressing

Recommended use:

• for work positioning and prevention of falls from a height

W0073

 possible combination with fullbody fall-arrest harness BODY II

Size: S/M/L, XL/XXL, XXXL Weight: (S/M/L) 575 g • 20.3 oz C€ 1019 • EN 358

W0092BB

HARNESS PADDING

Removable shoulder and leg padding intended for Body II, Basic and Basic Light harnesses.

- durable and soft material spreads the tension to a bigger surface to increase the comfort of wearing the harness
- reduces the effects of suspension trauma after a fall
- integrated loops on shoulder padding for hooks storage
- removable and washable padding

Size: S/M/L, XL/XXL Weight: 236g • 8.33 oz (S/M/L)

TECHNIC PADDING

W0097BB00

Removable shoulder padding for TECHNIC harnesses

- durable and soft material spreads the tension to a bigger surface to increase the comfort of wearing the harness
- integrated loops for hooks storage
- removable and washable

Size: UNI Weight: 100 g (3.5 oz)

Extremely light and durable sling intended mainly for connection between rear dorsal attachment point and self-retractable lifelines.

- allows an easy self-connection to the rear EN 361 D-ring
- made out of dyneema
- 15 cm and 5 cm long loops are on both ends of a sling
- big loop is overturned to make a Girth Hitch knot over a D ring

Length: 80 cm Width: 13 mm Weight: 40 g • 1.41 oz C€ 1019 • EN 354

REFLECT VEST

Fluorescent-colored vest with reflective strips certified accorsding to EN ISO 20471:2013. Suitable for all Singing Rock fall arrest harnesses with or without padding which can also be equipped with the Pole II positioning belt.

- Öko-Tex[®] certified 240 g/m² fabrics made of PES and cotton combination for improved comfort of the user
- stitched retroreflective stripes with microscopic glass beads
- reinforced holes with hook-and-loop fixation of straps, positioning attachment points and gear loops
- size adjustment system using hook-and--loop fixation on a flap
- fits to Basic Light, Basic, Body II, Body II Energy harnesses with or without attached padding and the Pole II positioning belt
- fulfils the requirements of EN ISO 13688:2013 Protective clothing and EN ISO 20471:2013 High visibility clothing

 Material: cotton, PES, glassWeight: 375 g 13.23 ozSize: S/M/L, XL/XXL, XXXL EN ISO 20471:2013 · EN ISO 13688:2013

W0102YB00

HOOK PARKING LOOP

Removable connector keepers for accommodating shock absorber lanyards on shoulder straps of a full-body harness.

- in case of a fall, a parked connector is released so that a shock absorber can be safely deployed
- suitable for most of Singing Rock full-body harnesses
- marking according to ANSI Z359.11-2014
- loop is reinforced with a plastic cover
- attachment using velcro
- sold as 2 pcs.

Weight: 14g • 0.5 oz (a piece)

SUSPENSION TRAUMA SAFETY STRAP

Auxiliary sling preventing effects of suspension trauma after a fall.

- helps to relieve pressure in the groin area while a worker is awaiting rescue
- easy to attach to a harness using a girth hitch and velcro strap
- plastic cover increases resistance during normal working activities
- patented Rock&Lock buckle ensures easy length adjustment
- colored stepping loop ٠
- suitable for Body II, Basic and Basic Light • harnesses

Weight: 63g • 2.2 oz Material: polyamide

Fully adjustable sit harness for work positioning. The new design of this sit harness is characterized by perfect functionality, great comfort and lightness. Intended for all vertical activities without any risk of the fall.

- super comfortable wide waist belt padding provides maximum comfort when working at height
- strength webbing on the waist belt is stitched in the way that at normal working situation the body weight is absorbed by the padding only
- anatomic leg loops and waist belt are covered with strong PES fabric providing high abrasion resistance
- SPEED buckles enable fluent and fast adjustment to fit a user's body
- side attachment points for work positioning according to EN 358
- front attachment point for descender placement or work positioning according to EN 813, EN 358

- reflective strap and printing on the waist belt increase the visibility in dark working
- conditions
 4 ergonomic braided gear loops with a bearing capacity 15 kg
- additional loops on the waist belt and leg loops with a bearing capacity of 5 kg offer additional space for the gear and better gear orientation
- slots on the waist belt for PORTER tool holder to carry your industrial tools

Size: S, M/L, XL Weight: (M/L) 1515 g • 53.44 oz Max. rated load: 150 kg C€ 1019 • EN 358 • EN 813

SIT WORKER 3D / STANDARD

Fully adjustable sit harness with easy-lock buckles for work positioning.

- thermo finished webbing in a waist belt for easy handling and higher durability
- all steel components finished with E coating for higher corrosion resistance
- super comfortable wide waist belt padding provides maximum comfort when working at height
- side attachment points for work positioning according to EN 358

Size: S, M/L, XL Weight: (M/L) 1195 g • 42.15 oz Max. rated load: 150 kg C€ 1019 • EN 358 • EN 813

URBAN II

FRANKLIN

Sit harness for work positioning

- anatomic waist belt and leg loops padding perfectly fits to man anatomy
- textile attachment point for work in hanging position, rappelling according to EN 813.
- textile positioning points according to EN 358 are placed symmetrically, tested for 15 kN strength.
- 2 braided gear loops with a bearing capacity of 10 kg provide enough space for 10 pieces of HMS carabiners
- additional loops with a bearing capacity of 5 kg offer additional space for the gear and better gear orientation
- slots designed for a secure hanging of expensive equipment (such as power saw, drilling machine,...)

Size: S, M/L, XL Weight: M/L 850 g (±15g) • 30 oz Max. rated load: 150 kg C€ 1019 • EN 358 • EN 813

W0010YB black version – W0010BB

Work positioning seat provides more comfort when hanging in the harness.

- intended for use with our fall arrest or work positioning harnesses
- easy to adjust with Rock&lock buckles. Attachment straps are shorter to fit better to thinner users
- inside padding is made of aluminium which allows long term use without any deformation
- wider sitting area ensures good stability and allows comfortable suspension as well as standing at work positioning
- suspension straps do not press on your thighs

 three D-rings (bearing capacity 50 kg) for bucket or other gear suspension

Max. load of seat: 150 kg Weight: 1615g • 57 oz W0022BB

RL CHEST

ALADIN

Chest harness

- designed to be used together with a sit harness
- optimising body positon while hanging or falling
- made from lightweight wide nylon webbing
- very durable and affordable to all climbers

Must be worn with sit harness. Do not use chest harness alone!

W0200BB

- non-padded
- Rock&Lock buckles on shoulder straps
- two D-rings with bearing capacity of 50 kg
- together with SIT WORKER 3D compose fully adjustable full body harness in con-
- formity with EN 361

Do not use separately - use only in combination with a sit harness!

Size: UNI Weight: 600 g • 21.2 oz € 1019

ARBO CHEST

Padded chest harness designed for the ARBO MASTER arborist harness.

- offers the user greater comfort when loading the harness with heavier equipment and a more comfortable ascent
- for comfortable donning, equipped with a trident with a whistle at the front
- in the shoulder padding, there is a tunnel on each side for threading a pull-on elastic band, which is specially designed for SRT technique
- loops on the front side for possible attachment of additional equipment and height adjustment for attaching a chest ascender

• the chest harness can be used with any harness equipped with three fixing eyes

The chest harness cannot be used alone!

Size: UNI Material: PAD, EVA foam, PES, Polyethylene, PP, Elastane Weight: 160 g / 5.6 oz Harnesses

ARBO MASTER

Fully adjustable work positioning harness with unique motion system at front attachment points, specially invented for professional arborists allowing freedom of movement at the tree top.

- super comfortable wide waist belt made of 3 inside webbings and wide leg loops made of 2 inside webbings provide maximum comfort when working in the harness
- removable and exchangeable bridge connecting the leg loops for variability of work at the tree top
- double rope connection bridge for two independent attachment points (EN 813) with a strength 15 kN
- knots on the connection bridge allow the length adjustment and replacement
- moveable O ring at the connection bridge as an attachment point (EN 813)
- adjustable red side D buckles between the leg loops and waist belt for the attachment point, used in a pair according to EN 813 with a strength 15 kN
- adjustable side positioning D rings possible to fold in when not in use
- replaceable adjusting webbing for D rings
- speed buckles enable fluent and fast adjustment of the waist belt and the leg loops, keep the adjusted size
- flexible rear rubber bands for adjusting the position of the leg loops
- 4 gear loops with a bearing capacity of 5 kg provide enough space for your gear
- rear loop for hanging heavy tools such as a chainsaw, etc. with a load capacity of 35kg
- 2 red textile loops with a load capacity of 5 kg for attaching a hand saw
- 2 small steel rings with a load capacity of 10 kg for attaching the chainsaw on the left and right side
- small textile loops to create your own additional gear loops with a load capacity of 5 kg
- loops at the waist belt for the possibility of attaching a chest harness

- slots for PORTER tool holder to carry your industrial tools
- wide rubber band for attaching the first aid kit to the harness
- neoprene pocket on the leg loop for small items
- identification and methodological label

Size: S/M/L, XL

Max. rated load: 120 kg Weight: 1680 g • 59.3 oz (S/M/L), 1760 g • 62 oz (XL) C€ 1019 • EN 358 • EN 813

EVACUATION TRIANGLE SIT II

Evacuation triangle for a person to rescue from a chair lift or a cable car.

- chest plastic buckle for easy putting on the triangle
- durable steel attachment points
- easy to put on and take off
- adjustable crotch webbing
- made from durable ripstop material

Only for rescue purposes. Size: UNI • Weight: 800 g • 1.8 lb EN 1498

EVACUATION TRIANGLE COMBI II

Evacuation triangle with shoulder straps for a person to rescue from a chair lift or a cable car.

- special shoulder straps for better fixing a person in evacuation triangle
- straps are made from different color for better attachment management
- durable steel attachment points
- easy to put on and take off
- adjustable crotch webbing
- made from durable ripstop material

Only for rescue purposes. Size: UNI • Weight: 880 g • 1.9 lb C€ 1019 • EN 1497 • EN 1498

W0005YBO9 black version – W0005BB09

Dog harness intended for transport of the dog from a helicopter.

- side light-alloy reinforcements
- easy and quick fastening with velcro
- max. load 150 kg

Size: UNI • Weight: 800 g • 1.8 lb

BABY RESCUE BAG

Rescue bag for the children evacuation.

- designed for rescue transporting of the children (height 40-110 cm, max. weight 25 kg)
- safety fixation by 3 belts with Velcro and with the safety straps led to cross during the transporting.
- inner padding is very comfortable and fully removable and washable
- top cover with full zipper and ventilation hole
- stabilization strap of the top cover to prevent the camber of the cover to the face of the child during the transport by the helicopter
- colored loops for the carabiner fixation and adjusting the position of the bag
- side ventilation holes covered by PVC net
- durable material with the reflection elements
- hygienic inner textile cover included
- fulfils EN 1498 requirements

Size: 80x45x35 cm Weight: 3300 g Max. load: 25 kg Material: PVC, PAD, PES, PES / cotton C€

RO PE

STATIC DYNAMIC SPECIAL SPELEO CORDS ACCESSORIES

ROUTE 44

experience the touch of the future

Route 44 is unique technology invented and patented by Singing Rock. Route 44 technology allows blending of properties that were considered impossible before. Rope braided by using Route 44 technology is more compact, softer and above all it is more durable than conventional rope. All that is achieved by making no compromises in using correct sheath thickness, which is round-braided by 44 carriers. These features combine to give you better rope.

ULTRASONIC

ULTRASONIC ending is an excellent way of rope ending.

All SINGING ROCK ropes are ended by a unique technology ULTRASONIC. The load-bearing core and the protective sheath are joined into a compact unit in the last 15 mm of the rope which eliminates the sheath slippage.

STITCHED EYE

Selected SINGING ROCK static ropes which are marked with Stitched eye icon are possible to produce with one or two stitched eyes at the end of the rope.

L0450RR - red	L0450OO – orange
L0450WG – white	L0450BB – black

Excellent quality static rope intended for rope access, work positioing, rescue or manipulation with the objects.

- type A rope low stretch kernmantel rope designed for general use with patented rope-braiding technology ROUTE 44
- sheath is made on 44 carrier machine thus the core/sheath ratio is ideal with reference to the strength of the rope and strength of the rope with knots
- sheath is braided more densely which provides better protection of the core against dirt and dust
- rope is running smoother through belay/ rappel devices with lower risk of core prolapse through the sheath when is bent over small diameters

- meets the requirements that the rescuers, firemen, specialists working at height and other professionals require when working every day
- ultrasonic ending eliminates the sheath slippage
- possible to be produced with one or two stitched eyes at the end of the rope

C€ • EN 1891 • Q. • packaging static ropes: pack - 30, 40, 50, 60, 70, 80, 100 m • spool - 100, 200 m

Static rope characteristic

Type A rope – low stretch kernmantel rope designed for general use by persons in rope access including all kinds of work positioning and restraint; in rescue and in caving Type B rope – low stretch kernmantel rope of a lower performance than type A ropes, requiring greater care in use (standard does not content other specification). Static strength defined in the standard

22 kN for the ropes of type A + 18 kN for the ropes of type B Another standard requirement says, the material used for rope production shall have the melting point higher than 195 °C, so polyethylene or polypropylene are not suitable for the production of the ropes.

Rope elongation

The rope elongation shall not be higher than 5% tested by loading the rope for 3 min with 150kg load (pretension 50kg)

Dynamic performance

Fall test with two meters long rope terminated with figure-eight knots; fall factor 1. The testing mass 100 kg for type A ropes, 80 kg for type B ropes.

HECTOR / SCREW HECTOR / TRIPLE LOCK

Large versatile pear-shaped HMS carabiner with screw/triple lock gate designed for multiple uses mainly for belaying or anchoring when working at height. Due to high strength and large gate opening it is mainly used as a central carabiner when anchoring.

- pear-shaped basket facilitates belaying with the Münter hitch or other belay devices
- angled snag free Keylock nose for smooth clipping and unclipping maneuvers
- rough notches on the screw/triple locking sleeve for easy manipulation even with gloves
- each carabiner is individually tested for a strength of 10 kN
- large rope bearing area for better rope glide and reduced wear on the carabiner
- gate opening and basket area are large enough to easily accommodate a big anchor point or more slings
- hot-forged l-beam construction makes the carabiner extremely strong, stiff and light

- excellent ergonomic provides perfect handling with the carabiner
- anodized finishing increases corrosion resistance
- unique production number for better traceability and inspection

BORA screw

Bora TWL

Versatile pear-shaped HMS locking biner designed for belaying, rappelling and anchor building.

- hot-forged I-beam construction makes the carabiner extremely strong, stiff and light
- large rope bearing area for better rope glide and reduced wear on the carabiner
- pear-shaped basket facilitates belaying with the Münter hitch or other belay devices
- angled snag free Keylock nose for smooth clipping and unclipping maneuvers
- opening and basket area are large enough to easily accommodate the clove hitch
- available with screw, twist and triple lock gate, all of them easy to handle
- for better gear management the screw gates are in different colors
- each carabiner is individually tested for the strength 10 kN
- unique production number for better traceability and inspection

Strength: +> 23 \$8 0 8 kN Gate opening (d): 22 mm Weight: Screw 63g / 2.22 oz TWL/Triple lock 68 g / 2.4 oz C€ 1019 • EN 12275 • EN 362 • ○

Bora triple

BORA GP / SCREW

HMS carabiner designed specifically to eliminate the dangers of cross loading.

- safety wire gate keeps the carabiner in its proper orientation
- hot-forged I-beam construction offers an improved strength/weight ratio
- large rope bearing area for better rope glide and reduced wear on the carabiner
- screw locking sleeve for great handling and effective locking
- very popular for climbing gyms and ropes centres

black - K0107BP00

K0107EP00

COLT / SCREW

K0112EE00 black – K0112BB00

Our smallest, super light locking carabiner. Ideal for belaying and anchor building on trad and alpine climbs.

- hot-forged I-beam construction makes the biner very light and still extremely strong with 11 kN gate open rating
- angled snag free Keylock nose for smooth clipping and unclipping maneuvers
- ergonomic shape and gate position designed to provide large opening and large basket area
- screw locking sleeve for great handling and effective locking
- for better gear management the screw gates are in different colors
- each carabiner is individually tested for the strength 10 kN
- Unique production number for better traceability and inspection

COLT SCREW 3PACK

Three super light and small locking carabiners for belaying and anchoring for reduced price.

- screw locking sleeve for great handling and effective locking
- for better gear management the screw gates are in different colors
- each carabiner is individually tested for the strength 10 kN

PORTER XL

NEW

Having the necessary equipment on hand is a prerequisite for efficient work. When working at heights, our patented largevolume material and tool carrier for work harnesses takes care of that.

- patented PRESS CLICK attachment system allows quick mounting/dismounting on the harness
- EASY WIRE function, leaving the carrier lock in the open position, allows you to simply remove and attach equipment with one hand
- nose on the top serves to organize your
- equipment and put tools away
 40 mm gate opening allows for hanging e.g. a chainsaw directly by the handle
- maximum load capacity of 20 kg with a

safety factor of 5 allows heavy loads to be carried

minimum breaking strength is 100 kg

Weight: 80 g • 2.82 oz Material: plastic, steel Gate opening: 40 mm Max. load: 20 kg Color: grey

WARNING: NOT FOR CLIMBING! PORTER XL is not a strength carabiner or anchor point! Do not use it for fall arrest or belay. It is not PPE!

K9000BB03

PORTER

Plastic holder for racking ice screws, pitons and industrial tools.

- for racking ice screws, pitons and industrial tools on the harness
- easy clipping and un-clipping
- the nose on the upper part allows to set away some stuff in order to access stuff on the bottom.
- rubber part fixes the Porter on place and prevent it from rotation

WARNING: NOT FOR CLIMBING! PORTER is not a strength carabiner or anchor point! Do not use it for fall arrest or belay. It is not PPE!

Gate opening: 23 mm Max. load: 5 kg Weight: 32 g • 1.13 oz

Color: black, bronze Weight: 28 g • 1 oz Material: aluminium alloy (anodized) Strength major axis: 3 kN Gate opening (d): 12 mm

TECHNOLOGY

KEYLOCK for easy manipulation

Key lock is an extremely simple and ingenious locking system that solves the problems associated with the traditional design of carabiners. It eliminates any risk of ropes or slings becoming entangled in the gate or in the carabiner nose when it is being connected or released. Neither the gate, which is completely cylindrical, nor the nose has any sharp edges. Ropes and slings do not, therefore, come into the contact with any cutting edges.

HOT FORGING the latest technology in manufacturing of light alloy hardware

Aluminum alloy is heated state when being forged into the final shape. This allows the metal to be formed more easily so it can be moved to areas where it is needed and removed from the areas where it is not needed.

In comparison with cold forged binners, the hot forged binners are lighter, more durable and stronger.

UNIQUE PRODUCTION NUMBER identification of metal parts

For better traceability and inspection recording the Singing Rock metal parts are marked with the unique production number. Singing Rock metal parts marked with the unique production number are in this catalogue indicated with text "unique production number".

Helmets

W9607

BLAST

Super comfortable and lightweight helmet for work at heights. Thanks to its well thought-out design and numerous features, it fits like a glove and you'll want to wear it all day long.

- lightweight construction with EPS liner, which is found in comfy sports helmets, will keep you comfortable even when working long hours
- optimally deep profile ensures better stability on the head
- you can tune the depth as needed with the height-adjustable forehead band, so the helmet won't fall backwards or into your eyes
- helmet is ventilated by vent holes which are covered by a steel grille
- side buckles under the ears with adjustable positioning ensure ideal routing of the straps around the ears and under the chin
- newly designed chin buckle is low-profile and works like a charm
- headband circumference can be easily adjusted between 53-61 cm using the rear rotary wheel
- for easy transport and storage, the back part of the headband with the adjustment wheel can be folded into the shell
- inner padding is removable and washable
- integrated universal 30 mm euro slots are compatible with most hearing protectors on the market as well as the Singing Rock LAMPFIX lamp holder
- smaller integrated slots are designed for connecting the Singing Rock COVER shield
- clips for attaching a head lamp are recessed thus snag-free when dressing or working
- thanks to reflective stickers, no one will miss you even in low visibility

- helmet can be used safely in temperatures ranging from -10 to +50 °C
- unique product number makes it easy to keep track of periodic inspections
- available in six colors, find yours

Helmets

FLASH

Professional protective helmets designed with emphasis to comfortability and durability. Helmets are available in two models depending on the user's choice according the working situation.

- helmet construction with shock resistant ABS/PC shell and without EPS lining provides great ventilation and comfort for user
- fully adjustable headband with two side and two rear adjusting sleeves to regulate the length of the chin straps
- fast, easy and durable size adjustment mechanism on the back of the helmet with UNI size 53–63 cm
- suspension straps easily adjustable to 3 depth levels

- four head lamp holders for any head lamp available on the market
- inner padding fully removable and hand or machine washable at 30 °C (86 °F)
- helmets can be safely used in the temperatures ranging from -30 to +50 °C (-22 to 122 °F)
- universal 30 mm accessory slot is compatible with most of the visors and hearing protectors on the market
- certified with Hellberg safety ear muffs
- reflective stickers included
- unique number marking

CLIMBING

FLASH INDUSTRY

red - W9601RX00 white - W9601WX00 yellow – W9601YX00 black – W9601BB00 high visible – W9601QX00

Professional safety helmet for industrial work and construction sites. Its main purpose is to protect the user against falling objects and voltage.

- safety chin strap in compliance with EN 397 is released at a load ranging between 15 and 25 daN (approx. 15–25 kg), which eliminates the risk of strangling
- suitable for working situations where, in case of foll, the risk of strangling is higher than risk of dropping the helmet
- fulfils EN 397 optional requirements: low temperature (-30°C), lateral deformation, electrical insulation (440V a.c.)
- five color variants
- fulfils side impact force requirements according to EN 12492

FLASH ACCESS

Protective helmet for work at heights, and rescue purposes. It is primarily intended for protection against falling objects and to protect against voltage.

- helmet has a solid chin strap that will withstand a load of at least 50 kg, which prevents the possibility of dropping the helmet in case of fall
- suitable for work at heights activities where, in case of fall, the risk of dropping the helmet is higher than risk of strangling
- partly meets the requirements the requirements of EN 397 and EN 12492
- fulfils EN 397 optional requirements: low temperature (-30°C), lateral deformation, electrical insulation (440V a.c.)

 fulfils side impact force requirements according to EN 12492

Weight: 455g • 16.05 oz Material: ABS/PC Size: UNI (53–63 cm) Color: red, high-visibility yellow C€ (LD, 440V a.c., -30 °C) C€ 1015

> red – W9602RX00 high-visibility yellow – W9602QX00

FLASH AERO

Protective well ventilated helmet for work at heights, and rescue purposes. Suitable for physically hard working persons. Its main purpose is to protect the user against falling objects.

- helmet has a solid chin strap that will withstand a load of at least 50 kg, which prevents the possibility of dropping the helmet in case of fall
- suitable for work at heights activities where, in case of fall, the risk of dropping the helmet is higher than risk of strangling
- partly meets the requirements the requirements of EN 397 and EN 12492
- fulfils ventilation requirements according to EN 12492 which ensures better ventilation for physically hard working persons and persons working in excessively warm environments
- fulfils side impact force requirements according to EN 12492

Weight: 455g • 16.05 oz Material: ABS/PC Size: UNI (53–63 cm) Colors: red, high-visibility yellow C€

PENTA

The second generation of the popular, lightweight, comfortable and ventilated climbing helmet. Due to its comfort and lightweight construction, it is ideal for sport climbing, trad climbing, mountaineering and via ferratas.

- the first climbing helmet on the market in three sizes (S 48-54 cm, M/L 52-58 cm, XL 56-62 cm) for the widest range of users
- 30 % larger vent area than the first generation ensures excellent ventilation even on the hottest summer days
- weight under 200 g (size M/L) ensures comfort for all-day climbing
- compact upper protects the user from falling objects, yet maintains a low profile
- hard PC shell protects against sharp objects, while PS foam absorbs the impact force
- thanks to its low profile, the helmet does not get in the way when climbing and fits neatly on the head
- comfortable and easy size adjustment system with straps that don't squeeze even after a full day of climbing
- soft and wide chin strap ensures maximum comfort and its length allows a scarf or hat to be worn under the helmet
- clips for attaching the head lamp are recessed to avoid catching them when removing the slings or hood from the jacket
- inner padding is in one piece to prevent the loss of smaller parts, holds better, is completely removable and washable
- available in 4 colors with a modern look

HEX

Durable, fully ventilated helmet for climbing, mountaineering and other rope activities. Due to its durability, ventilation and versatility, it is suitable for both sport and trad climbing, via ferrata or rope parks.

- durable EPP + ABS shell protects against falling objects and guarantees a high degree of protection against impact force, including repeated impact force
- the "OPEN CELL" construction with 35 ventilation holes with a total area of 108 cm² guarantees maximum ventilation
- easy and quick size adjustment mechanism in the back of the helmet
- chin strap made of a soft and wide webbing provides maximum comfort
- inner padding is made as one piece, which prevents the loss of smaller parts and holds better
- inner padding is removable and washable
- integrated "EASY CLIP" front clips for reliable attachment of a headlamp, their shape prevents jamming of a hood / slings
- the "UNI FIX" elastic system on the backside simply attaches any headlamp or ski goggles
- available in two sizes (M 52/58cm a L 55/61cm)
- modern design and 5 colors

X0049XX00

SAFE NYLON MESH VISOR X0051XX00

- suitable for electrical work visor is possible to attach with or
- without the earmuffs
- for attaching to the FLASH helmet SAFE 2 FLEX CARRIER and SECURE earmuffs or CLASSIC ADAPTOR are needed

Material: PC Length: 200mm • Weight: 116g Thickness: 1,5mm CE • EN 166/1B389 • EN 170/2-1,2

- Light weight and non-conductive visor which stays close to your face for great coverage.
- gives a comfortable airflow
- approved to low impact
- visor is possible to attach with or without the earmuffs
- for attaching to the FLASH helmet SAFE 2 FLEX CARRIER and SECURE earmuffs or CLASSIC ADAPTOR are needed

Light transmisson 58–61% Length: 185mm Weight: 36g C€EN 1731/F • ANSI Z87

SAFE STEEL MESH VISOR X0050XX00

The unique hexagon shaped etching provides superior light transmission for added safety in low-light conditions.

- stays close to your face for great coverage
- gives comfortable airflow
- approved to low impact and suitable for applications such as forestry work and grass/bush trimming
- visor is possible to attach with or without the earmuffs
- for attaching to the FLASH helmet SAFE 2 FLEX CARRIER and SECURE earmuffs or CLASSIC ADAPTOR are needed

Weight: 52 g • Material: steel Light transmission: 82–85,5% Length: 185mm C€ • EN 1731/F • ANSI Z87

SAFE 2 FLEX CARRIER

X0052XX00

Allows attachment of the flex carrier for face shield without earmuffs.

- compatible with Flash helmets
- sold in pair

HELMET ACCESSORIES

COVER

Sight is the most important sense. The COVER shield for Singing Rock work helmets protects eyes from fast-moving particles. With this visor, no mess will hit your eye and you'll finish your job without a hitch.

- compatible exclusively with Singing Rock FLASH and Singing Rock BLAST helmets (cannot be used alone or with other helmets)
- designed for professional use, meets PPE Category II requirements
- provides increased protection against fast moving particles
- anti-scratch surface treatment ensures excellent optical performance

- durable positioning mechanism perfectly holds the shield in the open or closed position
- fabric pouch for transport and storage included

Weight: 110 g • 3.9 oz Material: polycarbonate Cۥ EN 166 1 F

COVER SMOKE

Sight is the most important sense. The COVER shield for Singing Rock work helmets protects eyes from fast-moving particles and, in the SMOKE variant, from the harsh sun. With this visor, no mess will hit your eye and you'll finish your job without a hitch.

- compatible exclusively with Singing Rock FLASH and Singing Rock BLAST helmets (cannot be used alone or with other helmets)
- designed for professional use, meets PPE Category II requirements
- provides increased protection against fast moving particles
- level 2.5 filter protects eyes from sunlight
- anti-scratch surface treatment ensures excellent optical performance

- durable positioning mechanism perfectly holds the shield in the open or closed position

ANCHOR AND BELAY DEVICES ASCENDERS DESCENDERS PULLEYS SELF BRAKING DEVICES RETRACTABLE FALL ARRESTERS

SIR

K032SIR00

DESCENDERS

Robust multifunctionality device for use in industrial rope access. Its functionality spans the range from rope descender and abseiling device through fall-arrest device to work positioning device for use on roofs and edges.

- unimpeded movement of the cam
- by pulling onto the working end of the rope the cam engages and jams the rope
- by pulling the lever the cam gradually releases the rope. If the lever is pulled down to its terminal position the doublestop function is triggered which blocks the rope again
- spring loaded pin for impeded swinging of the cam
- easy and intuitive installation of the device onto the rope. (watch the pictograms and read the instruction of use)
- no hidden mechanisms for easy inspection
- metal lever under all industrial conditions tested for 225Kg according to EN 12841(rope access)

Weight: 365g • 12.88 oz Rope diameter: 10–12 mm Working load: 225 kg

EN 341-A Singing Rock static rope R 4411mm EN 12841-C static rope 10–12mm C€ 0123

K031DSD00

DOUBLE STOP PLUS

Descender with anti-panic system in case of accidental loss of descent control.

- the descender doesn't have movable flanges. This makes it a robust and mistake-resilient device (quick insertion and release, no need to unclip it for rope insertion)
- new cam tested for higher loads enhanced braking in both stop positions
- Unique way of rope insertion. Diminished possibility of incorrect insertion of the rope. Even incorrect insertions will not result in a fall as the rope is blocked.
- sensitive and longer handle enables smooth descent without harmful rope twisting, gentle and progressive braking (enhanced press stop braking mode)
- rubberized handle provides pleasant feeling, non slip and thermal insulation.
- ergonomically improved curved edges and longer flanges provide the user with a comfortable grip with the handle
- integrated wear indicator
- high strength plain bearing added to the pivoting cam
- all parts in contact with the rope are

made of stainless steel – minimum possible wear

rope diameter: 9–12mm
 9mm – max. rated load 130 kg
 10–12mm – max. rated load 200 kg

Weight: 421 g • 14.85 oz • Breaking loads in excess of 22 kN.

Increased maximum rated load to 200 kg. Reduced slippage of the rope to 600 daN. Reduced force required on the handle. C€ 0123 • EN 12841 TypeC

DESCENDERS AND BELAY DEVICES

INDY EVO PLUS

Manually operated descender device with double auto-locking system, that locks both when the lever is released or when it is pressed.

INDY EVO is also a descender device (conform to EN 12841 type C) for working rope and it allows a descent at a controlled speed and stop at any time, hands free, on a static rope (EN 1891) or dynamic rope (EN 892).

It allows the lowering of two people at the same time.

Dimensions: 212x58x38 mm Weight: 480 g • 16.9 oz Rope Ø 10-12 mm (100 kg) Rope Ø 11-12 mm (200 kg) NFPA 1983 (2012 ED) Rope Ø 10-13 mm (one person only) C€0426 • EN 341 • EN 12841

grey – K0043SX00 orange – K0043OX00

RAMA

Intuitive single rope belay device with enhanced braking feature. Designed for gym or single pitch sport climbing.

- reliable locking geometry provides added level of safety to your belay
- operating is very simple, as it works without any moving parts or lever
- large clipping area for most common carabiner shapes, works best with BORA or OXY carabiner
- durable stainless steel braking surface provides longer lifetime and the smooth and secure control for gradual lowering
- functionality is according to the tube principle and is therefore suitable for lead and top-rope climbing
- compact geometry makes paying out rope even faster and easier, while the handle has a comfortable and firm grip.

Single rope belay device with enhanced braking feature and hot-forged light alloy oval carabiner OXY TWL create a perfect set for lead or top-rope climbing.

SHUTTLE

Belay and rappel device

One device to do it all, the Shuttle offers maximum versatility. It has a groove, designed and shaped to provide equal friction for both thin and thick ropes.

- When you're belaying from above, the "guide mode" lets you bring up one or two seconding climbers under control. For lowering, it has a small secondary hole that you can clinch carabiner or sling to release the device.
- designed for twin, half and single ropes
- lightweight and compact
- V-grooves for high friction when belaying the leader or rappeling
- only 65 g one of the lightest belay devices on the market
- self locking function when belaying the second
- eye for releasing the weight
- possibility of simultaneous belaying two climbers
- weight: 65g 2.29 oz
- material: light alloy

Rope diameter: (2)(3) 7,8 – 10,5 mm (1) 9 – 10,5 mm EN 15151-2

RK806BB00

Lightweight pulley with two attachment holes Designed for tree climbing application. Suitable for use with Prusik friction knot.

- two attachment holes with strength 28 kN
- anodized aluminum alloy side plates
 aluminum alloy sheave for textile ropes
- and auxiliary cords up to 13mm in diameter • bronze self lubricating bearing ensures
- reliable efficiency up to 81%
- unique production number marking

Weight: 105 g (3.7 oz)Material: sheave and side plates - aluminium alloy, bearing - bronze, axle - stainless steelStrength: 28 kNMax. diameter of rope: 13 mmBearing: friction

C€1019, EN 12278

EASY LIFT

Rescue pulley for cableway evacuation.

- designed to connect directly on the carrying steel cable of the cableway
- it is used during rescue operations and is used for the rescuer's crossing from the cableway support to the seat/cabin and rescued persons
- thanks to two sheaves construction it does not jump even on a rough steel cable
- lighter about 50 g than previous Easy Lift
- bigger gate opening allows to use the pulley on a thicker rope and more massive seat feet, eg. six seat cableways
- for steel rope with max. diameter 60 mm
- marked with a unique production number for better traceability and inspection

Weight: 1350 g • 3 lb Strength: 30 kN Max. diameter of steel rope: 60 mm Max. speed: 2 m/s Working load: max. 6 kN Sheave: POM Material: light alloy, POM, stainless steel C€ 1017

RIGGING PLATE 3/5

Aluminium alloy device for multi-point anchoring.

- provides efficient force distribution at different load directions
- low profile of the plate makes the connection as short as possible
- provides plenty of attachment holes
- rounded holes allow direct attachment of the ropes and slings to the rigging plate
- all attachment points are big enough to allow locking sleeves of most carabiners passing through

Weight: 145 g • 5.1 oz Material: light alloy Strength: 50 kN • Thickness: 8 mm C€ 1019

RIGGING PLATE 1/3

Aluminium alloy device for multi-point anchoring.

- helps to organize carabiners at the anchor point
- provides efficient force distribution at different load directions
- rounded holes allow direct attachment of ropes and slings to the rigging plate
- central attachment point can accommodate up to three carabiners
- all attachment points are big enough to allow locking sleeves of most carabiners passing through

Weight: 65g • 2.3 oz Material: líght alloy Strength: 36 kN • Thickness: 6mm C€ 1019

ANCHOR DEVICES

RINGO

Detachable ring for arborists and workers at height. Intended for semi-permanent connection. Can be loaded in any direction.

- strong and light body made of aluminium alloy
- minimum strength 20 kN in any direction
- inner diameter: 46 mm
- 10 mm clipping gap
- steel bolt
- unique seríal number

Weight: 75g + 2.6 oz Strength: 20 kN Gate opening (d): 10 mm C€1019 • EN 362

Spare part: K7003XX00 Bolt for Ringo (2 pcs)

RING

Load sharing rings used by a person for fall protection for work at height or mountaineering.

- anodized surface
- unique number marking
- two sizes, with inner diameter 28 or 46 mm

Weight: 39g • 1,4 oz (28 mm), 57g • 2,0 oz (46 mm) Material: light alloy Strength: 25 kN C€1019

PILOT R3

Pilot R3 Concrete Anchor is a reusable, safe, and secure anchorage solution for horizontal, vertical, or overhead anchoring applications.

- A rapid quick-release button allows users to easily install and remove, boosting productivity.
- Built with a rigid tri-wedge design and diamond-hard carbon coating, it enhances durability in all types of concrete applications.
- The anchor incorporates an omni-directional design allowing the connector to rotate 360 degrees, and flip back and forth 180 degrees, to increase connector compatibility.

- Secure one-hand operation with push-tostop installation
- Cycle tested to 5,000 uses
- Corrosion-resistant stainless-steel tri-wedge design
- Forged stainless steel swivel D-Ring
- For one user only

Diameter of a hole: 20 mm (3/4") Weight: 350 g • 12.4 oz

A0002SS01

Stainless steel durable permanent anchor point.

- works also in soft or pocketed stone
- smooth eye allows safe rope threading for retreat
- made of welded, grade AISI 316 stainless steel
- for drilled hole with diameter 12 mm
- recommended glue: UPM 44 or FIS 360V, resin capsule RM10

Diameter: 10 mm Length of shaft: 80 mm Weight: 120 g 3.18 oz Strength: 4> 30 kN \$ 25 kN EN 959 • EN 795 Type A

D-MOBILE

Door or window anchor point

- an indispensable anchor point protect against sudden falls
- the safety traverse offers in connection with the rope perfect safety solution when working in wall openings and on balcony support plates
- no tools are needed to fix the traverse in doorways, the opening of which may be up to 1100 mm wide for one person for two persons can be maximum opening up to 900 mm
- fast adjustment by pressing the pawl
- star grip to clamp the safety traverse
- bearing surfaces coated with synthetic material

Strength: 22 kN • Weight: 11 kg Dimensions: 141 x 13 x 13 cm €€ 0123 • EN 795 Type B

ANCHOR DEVICES

VERTICAL FIXED BEAM CLAMP

Fixed I-beam anchor is designed to clamp onto a vertical or horizontal I-beam to create a fixed anchor point.

- zinc plated components
- stainless Steel D-Ring Mount
- static tensile strength: 22kN
- maximum capacity 140kg when used as a single point anchorage

Span: 100–350 mm Maximum load: 140 kg Weight: 3105 g • 109.5 oz

Strength: 22 kN C€ 0321 • EN 795:2012 • ANSI Z359.18 • ANSI Z359.7 • OSHA 1910.66/ • OSHA 1926.503

SNAKE BRACE

Anchor point for through holes, designed to function as a link between the structure and the fall arrest, work positioning, rope access or rescue systems.

- intended for through holes whose minimum and maximum diameter corresponds to the type of Snake Brace in relation to the actual thickness of the current structure
- the opening need not be entirely regular but the minimum diameter must be flat. There must be a minimum space for installation behind the hole
- intended for a single user
- the maximum strength can be used only if the structure in which the anchor hole is located can withstand the load in all directions
- the minimum strength of the construction should be designed according to EN 795 (if not in accordance with EN 795, the load bearing capacity may be reduced)

- Snake Brace can be loaded in any direction only if also allowed by the construction in which is anchored
- can be used only with compatible connectors with locking mechanisms according to EN 362

RETRACTABLE TYPE FALL ARRESTERS:

This part of your safety system allows you to move freely within a certain distance during your work and absorbs the impact in the event of a fall. All devices are certified according to EN 360:2002, some of them are suitable for rescue purposes according to EN 1496:2007. SRL (self-retracting lanyard) devices are self-retractable, while winches are manually operated. IKAR line is an ultimate hi-end range with a variety of solutions to cover all possible needs. These sturdy, low-maintenance height safety devices with webbing or galvanized steel lifeline are offered mainly in aluminium case featuring a rotational attachment swivel to better ergonomics and long lifetime. IKAR devices function in any location position and have been tested in a simulated fall trial over an edge according to CNB 11.060 2008 sharp edge type A (with exception of HRA series). Connectors incorporate a fall indicator for easier inspection.

IKAR HWB

Retractable fall arrester with webbing lifeline and built-in shock absorber featuring rotating attachment point and double action connector.

- lightweight aluminium housing with a webbing lifeline
- swivel eye attachment point
- sewn in load indicator on lifeline
- additional testing against falls over edges (r≥0,5mm)
- light alloy double action hook on end of lifeline
- device can be attached to an anchorage point or safety harness

DAVIT

Davit has a modular design that allows to build a system, which would precisely fit all possible applications in every confined environment. The swivelling davit sets are free standing or attachable to walls, tanks or other entrances. A simple plug-in mechanism allows quick and purposeful installation. In order to build your davit system, order a cantilever arm, choose from a range of fixed or temporary bases and sleeves and add required consoles for IKAR HRA self-retracting lanyards or PLW winch attachment. Designed with an integrated, easy to set fall brake system and the ability to mount mechanical devices as winches and retractable fall arresters, IKAR davits provide the customer with peace of mind for years to come.

IKAR AAS-1 CANTILEVER ARM

X4005XX00

Cantilever arm with permanent angle of 49° is developed for stationary use in safety and rescue cases for two persons, as well as for lifting and lowering loads.

- built-in 3 pulley systems redirect wire ropes from attachment point of the winch and SRL to confined space entry
- Cantilever arm is made from high quality V4A stainless steel
- Suitable for fast relocation from one sleeve to another due to foldable design of 2 detachable parts – upper davit and lower mast.
- Additional attachment point provides a possibility of attaching an SRL or fall absorber with lanyard to secure a cantilever arm operator or assistant.
- Suitable for two persons with load capacity of 300 kg

IKAR MOBILE ATTICS BASE

Sleeve is designed to sit on the top of a concrete bund wall 200mm-400mm or container edges.

It is ideal for work areas where frequent assembly and disassembly is required. Material: stainless steel 1.4571 (V4A) Dimensions: 350 x 729 x 335 mm (length x width x height) Weight: 35 kg C€ 0299 • EN 795:2012 Type B • CEN/TS 16415:2013

IKAR WINCH CANTILEVER ARM CONSOLE

X4015XX00

Stainless steel bracket designed to fit IKAR PLW Winch to cantilever arm. Bolts directly onto the davit's arm and comes complete with fixings and stainless--steel fixing pin for the PLW winch. Material: aluminium Dimensions: 200 x 130 x 82,5 mm (length x width x height) Weight: 2,4 kg

CANTILEVER ARM CONSOLE

IKAR HRA 12-24 - X4013XX00 IKAR HRA 33 - X4014XX00

Stainless steel bracket designed to fit IKAR HRA recovery devices to IKAR Davit's mast. Bolts directly onto the davit' mast and comes complete with fixings and stainless--steel fixing pin for the device. Material: stainless steel 1.4571 (V4A) Dimensions: 264 x 162 x 250 mm (length x width x height) Weight: 3,5 kg (5 kg for HRA 33 version)

X4002XX00

IKAR DB-A3 TRIPOD

Portable tripod with adjustable locking legs and 3 intergated pulleys. Head construction allows a variety of leg angles and a safetychain-free design. Ideal for economical compliance in many basic confined space, fall arrest applications and resuce.

- Up to 2,54m high aluminium tripod with corrosion-resistant coating featuring 3 bolts-in anchor points
- 1,56 m in collapsed setup for transportation, weight is 24 kg
- 2 stage independently adjustable telescopic legs with stainless steel pins and foldable rubber shoes with spiked edges. The individually adjustable legs

are advantageous as they can be used on uneven ground

- 3 pullies built into a die casted head
- Tripod is designed to be used without support safety chain, which reduces a risk of tripping
- Suitable for two persons with load capacity of 300 kg
- Console and IKAR HRA not included

Height: min. 1,43 m, max. 2,54 m Diameter: min. 0,64 m, max. 2,19 m Weight: 24 kg C€ 0299 • EN 795:2012-10 Typ B • CEN/TS 16415:2013

IKAR WINCH TRIPOD CONSOLE

IKAR PLW WINCH

Universal aluminium bracket to connect an IKAR HRA (up to 60m) to an IKAR DB-A3 tripod. Dimensions: 255 x 165 x 78 mm

(length x width x height) Weight: 1.8 Kg

A4064XX30

Hand crank winch for easy and jerk-free lifting and lowering of persons and loads according to Directive 2006/42/EG with 30 m stainless steel rope of Ø 6mm (min. breaking load 18.76 kN). SWL is 300 Kg. Material: stainless steel 1.4571 (V4A), PA Dimensions: 230 x 336 x 200 mm (length x width x height) Weight: 18,5 kg CE • EN 1808:2015

EVAQ HUB II

Descender and rescue device with lifting function for height rescue by fire fighters, industrial climbers and others when exposed to a danger at great heights such as cable cars, outdoor parks, wind power plants or skyscrapers. Also suitable for quick and easy rescue and even for self-rescue of many threatened people. Certified according to EN 341:2011 class 1A (2 persons), EN 1496:2017 class B (2 persons), ANSI Z359.4:2013 (1 person), EN 12841:2006 Typ C (1 person)

- designed for a working load of 225 kg (2 persons)
- automatic and redundant brake system consists of 2 fly wheel brakes
- brake drums are made of steel for high resistance
- equipped with a handwheel made of durable plastic for easy and save operation even in hard conditions and under a full load
- three stainless steel eyebolts ensure smooth descend speed control and multiple operation modes
- back side rope clamp facilitates lifting operation
- to make the lifting easier the device is equipped with a 10 mm hexagon adapter for accu-drill connection

- attachment point is equipped with a steel double trigger automatic locking connector with a gate opening of 21 mm
- static polyamide kernmantle rope can be up to 500 m long
- both ends of the rope are equipped with a stitched eye and a steel double trigger automatic locking connector with a gate opening of 21 mm
- for a storage and transport we recommend a shock and waterproof plastic PROTECTIVE CASE in two sizes with a volume of 17 and 46 litres or a storage RESCUE BAG with a volume of 30 litres
- when the device is stored in a sealed protective case an annual inspection is easier without the necessity of dismantling this device. It may be carried out by a competent person.

Weight: 3.9 kg (138 oz) + rope Working load: 30 – 225 kg (66 – 495 lb) designed for 2 persons Length: descent height max. 500 m (1640 ft) Descending speed: 1,0 m/s with 85kg and approx. 1,5 m/s with 170kg Temperature range: -40 °C to +65 °C C € 1019 • EN 341:2011 – 1A, EN 1496:2017 – B, EN 12841 Type C, ANSI Z359.4:2013

EVAQ ROPE

Rope for the EvaQ II a EvaQ HUB II rescue devices

- length according to the customer's request, max. 500 m
- both ends of the rope are equipped with a stitched eye and a steel double trigger automatic locking connector with a gate opening of 21 mm

Material: polyamide Diameter: 9.6 mm EN 1891A W1520X

EVAQ CASE WITH SEALING

Singing Rock offers devices for height rescue EVAQ II and EVAQ HUB II stored in a sealed PROTECTIVE CASE. Sealing is used to avoid laborious annual inspections of the complex rescue device. Only a visual inspection by a competent inspector without the necessity of dismantling the device is needed in case the seals are not damaged.

with EVAQ HUB II - W1522

W1522S / EvaQ HUB II, Protective case 17, seals – up to 40 m of rope W1522L / EvaQ HUB II, Protective case 46, seals – 40-120 m of rope

For bigger size case option, please contact Singing Rock.

OPEN SLING 14MM

TIMBER ACCESSORY CORD

With sewn eyes.

rope diameter 8 and 10 mm

the use of the PES/TECHNORA material combination results in a better thermal and mechanical resistance of the sheath Length:

diameter 8 mm - 75, 80, 85, 100 cm diameter 10 mm - 80, 85, 90, 100 cm Strength: 18 kN (8mm) 20 kN (10 mm)

C€1019 . EN 795B

PRUSIK SLING

Sewed accessory cord with a diameter 8 and 10 mm for wide use at tree care and rescue operations.

- well knotted for easier work at height and for more comfortable installation of Prusik knot
- suitable also as an anchor sling, adjustment sling and for the hauling systems

W2603YB00

Color: red/white (8 mm), yellow/black(10mm) Diameter: 8 and 10 mm Length: 38 cm • 15 in Strength: 18 kN Working load: max. 1 person Material: PES, Technora Weight: 48g • 1.7 oz (8 mm), 70 g • 2.5 oz (10 mm)

CE1019 . EN 795B

PULLEY SLING

Prusik sling with the stitched pulley SMALL for creating the anchor point.

- sling with the pulley is suitable to use • as a textile blocking device for wide use mainly at the tree care and rescue operations
- spare part for BARK PULLEY SAVER
- suitable also for other work at height as an anchor point

Strength: 18 kN Length: 40 cm • 15.7 in Diameter: 10 mm Working load: max. 1 person Material: PES, Technora, light alloy Weight: 160g • 5.6 oz C€ 1019 • EN 795B

W2604RR00

RING SLING

Well knotted prusik sling with stitched ring with 28 mm diameter for creating the anchor point.

- sling with the ring is suitable to use as a textile blocking device for wide use mainly at the tree care and rescue operations
- spare part for BARK RING SAVER
- suitable also for other work at height as an anchor point

Strength: 18 kN Length: 40 cm • 15.7 in Diameter: 10 mm, ring 28 mm Working load: max. 1 person Material: PES, Technora, light alloy Weight: 115 g • 4 oz C€ 1019 • EN 795B

JINGLE II

Cambium saver intended for use in tree climbing as anchor device and belay anchor. The different size of the rings enables easy and quick installing and removing of the sling from the ground. As well suitable in industry as an anchor device.

- length of the slings with "O" ring – 100, 120, 150 cm
- strength 25 kN
- inside and outside diameter of "O" rings: ALU: big 46/70 mm, small 28/52 mm steel: big 58/78, small 38/57

- 3 layers of webbing sewn together
- red colour of webbing for better visibility

steel ring – W1040R ALU ring – W1041R without ring – W1042R

 available with aluminium "O" rings or without "O" rings.

BARK PULLEY SAVER

W2115

Adjustable cambium saver intended for use in tree care operations.

- adjustable length and possibility to exchange the parts of the cambium saver in case of damage
- pulley sling allows smooth and fast movement in a tree top
- steel plush (22 mm diameter) with accessory cord allows to remove the cambium saver from the ground
- available in two lengths

Length: 1.25 and 1.5 m • 4 and 4.9 ft. Weight: 470 and 495g • 16.6 and 17.5 oz

Set includes:

- W2112 PATRON LANYARD STEEL RING
- W2603YB00 PULLEY SLING
- sheckl
- W2118XX00 retrival plaque with accessory cord

W2116

BARK RING SAVER

Adjustable cambium saver intended for use in tree care operations.

- adjustable length and possibility to ex-
- change the parts of the cambium saver in case of damage
- removing the sling with pulling ball with a diameter 32 mm or tieing a barrel knot at the end of the rope
- available in two lengths

Length: 1.25 and 1.5 m • 4 and 4.9 ft. Weight: 318 and 340 g • 11.2 and 12 oz

Set includes:

- W2112 PATRON LANYARD STEEL RING
- W2604RR00 RING SLING

ARBO SITE

TREE ANCHOR

Work positioning lanyard specially intended for tree care operations.

- allows smooth length adjustment thanks to the use of friction knots (Prusik knot) and pulleys
- the advantage of this set are two strength stitched eyes which allow to create two independent work positioning lanyards
- the set is delivered in two lengths and is ready to use
- each component is replaceable in case of damage

W2117

- Work positioning set includes: • W2117 PATRON LANYARD
- W2608 TIMBER ACCESSORY CORD
- RK806BB00 pulley MIKY
- K0122BB07 2x carabiner OXY/TRIPLE LOCK

Length: 3.5 and 5.5 m • 11.5 and 18 ft. Weight: 638 a 860 g • 22.5 and 30 oz C € 1019

Note: This set is not certified according to EN 358, as it consists of removable components. However, it is generally recognized according to Arboricultural Organizations (ISAs) and working practices.

W2114

Connection and anchor device for work at height. Multipurpose anchor device for creating the anchor point mainly on the tree. Designed for the arborists and rescue.

- static rope with a diameter 11 mm
- stitched steel ring (diameter 38 mm) at one rope end for variable use
- strength stitching is covered with plastic cover

Strength: 22 kN Diameter: rope 11 mm, ring 38 mm Working load: max. 1 person Materiál: PA, steel, PVC Length: 5 m Weight: 525 g • 18.5 oz C€ 1019 • EN 795B • EN 354

FOOTER XP

TOOL HOLDER

Lightweight ascender loop made from 6 mm accessory cord.

- webbing in the buckle simplifies the length adjustment
- XP buckle allows to adjust the length even when loaded
- big hole in the buckle for the attachment with any type of carabiner
- reinforced step loop is equipped with an elastic strap which keeps the proper position of the foot
- Min. length: 30 cm (12 in) Max. length: 170 cm (67 in) Weight: 105 g (3.7 oz) Max. load: 180 kg Material: PAD, light alloy

W1028BY00

Elastic sling to attach the tools to the harness which makes the loss of the tool impossible.

- designed to provide comfortable work while
- working with the tools at height
- high durability and flexibility
- steel weldet eye
- length of the sling can be extended up to 130 cm

Material: PES, PAD, steel, elastic fibre Load capacity: 25 kg Weight: 30 g • 1.06 oz Lenght: 70 cm, (130 cm fully extended)

Never use this sling for belaying!

TOOL HOLDER MAX

Elastic sling for attaching heavier tools to the work harness.

- prevents tools from falling when working at heights
- stainless steel ring with 40 mm inner diameter for connection to the harness material carabiner (PORTER)
- suitable for chain saws and other tools up to a maximum weight of 10 kg

Length: 85–150 cm • 33,5–59 in Weight: 95 g • 3,4 oz Load capacity: 300 kg • 660 lb Material: PAD, elastic fibre, steel

W4400WW00

REACTOR 140

Shock absorber used primarily by workers on a structures, ladders and pylons. Lightweight, practical shape does not restrict users at the work. Newly designed for users with a maximum weight of 140 kg (including equipment).

- designed to safely capture a person weighting 140 kg (including equipment)
- maximum active breaking length of shock absorber is 175 cm
- optional length of lanyards for diverse work
- zipper around the perimeter of the cover for easy inspection of the energy absorber
- intact, orange indicator of energy absorber activation

- any EN 362 certified connector can be sewn into the attachment loop
- orange indicator is threaded through the attaching loops and indicates an actual damage
- cover is made from black synthetic rubber and Cordura with PU coating
- oval shape for easy grip
- different webbing lengths are produced on customer's request

Weight: 170 g • 6 oz (without any connector and lanyards) WLL: 140 kg €€ 1019 • EN 355

JOULE

Fall absorber

The fall absorber Joule presents optimal solution for securing persons working on horizontal constructions and roofs. Joule is activated after reaching the load of 2 kN (200 kg).

Minimal guaranteed strength after the breaking action is 15 kN.

C€ 1019 • EN 355

JOULE 70 is possible to use with the fall absorber LOCKER, for working situation which requires longer distance from the safety line.

EN 353-2, EN 355

This is not a final product, this set is necessary to set up from the separate parts.

- fits men & women, available in two sizes

Size: S–M (52–55 cm), L–XL (56–59 cm) Material: 52% polyamide, 42% polypropylene, 6% elastan

C0069

A Wool/acrylic mix of beanies, featuring a double layered headband and embroidered design.

- · fits well under the helmet
- fleece double layered headband for colder conditions

Size: UNI Material: wool, acrylic

BEANIE HAT

BLACK ARROW – C0079BX00 LOGOS – C0080BX00

SCARF

BLUEDING

Multifunctional scarf 8 in 1 with a wide variety of uses for your protection against wind and cold.

- can be used as a balaclava, cap, masc, scarf, beanie, shawl, ear warmer, etc.
- made from elastic high-tech 100% polyester microfibre fabric that keeps its shape well, as well as being breathable, warm, soft, lightweight, of a very high quality and antibacterial.
- machine washable at 30 °C, cannot be tumble dried, air dry very quickly

Size: UNI (approx. 25 cm wide x 46 cm long) Weight: 35 g • 1.24 oz

0.51 - P0010X050 0.31 - P0010X030

PITCHER

BEER MAT

Wooden beer mats under your favorite glass of beer or cup of tea and coffee.

- perfect way to protect the surface of your table from the wet beer mugs or coffee cups
- made of very durable, high quality birch plywood coated with transparent varnish

Classical beer pitcher 0.51 or 0.31 for all who likes climbing and all activities on our vertical playground.

SQUARE - P0047XX01 CIRCULAR - P0047XX02

Weight: 50 g • 1.76 oz Material: plywood Thickness: 8 mm Dimensions: 9 x 9 cm • 3.5 x 3.5 in, Ø 10,5 cm • 4.1 in

WHOLE BEAN COFFEE CAN

Whole bean coffee for outdoor enthusiasts and coffee lovers. Enjoy the coffee time before/after your climbing or working day.

- whole bean coffee in a practical can, thanks to which the coffee retains its freshness and aroma
- for finest taste, always use clean, filtered water

Weight: 150 g • 5.3 oz Coffee: 100 % Arabica

P0038W150

P0048X400

TRAVEL MUG

Travel Mug for your favourite coffee, tea or cold drink when you are travelling, camping or working in the office.

- keeps your drink hot or cold exactly as you need it
- BPA free no-spill top features a handy hinged lid to securely close when it's not in use
- made from durable, high-grade stainless steel that preserves the flavour and freshness of your drink
- double vacuum-insulated wall keeps the drink hot / cold for long hours, making it ideal for travel by car or other means of transport
- exterior is made from a bamboo composite material which protect your hands from the heat
- non-slip bottom, suitable for all common drink holders in the cars

Weight: 170g • 6 oz • Volume: 400 ml • 14 fl. oz Height: 17 cm • 6.7 in Material: stainless steel, bamboo, BPA free plastic

GROUND COFFEE OUTDOOR

P0038GB10

Coffee for outdoor enthusiasts and coffee lovers. Enjoy the coffee time before/after your climbing or working day.

- each bag includes tear open inner pack which can be placed on any cup
- for finest taste, always use clean, filtered water, pour 180-200 ml, leave for 5 minutes and enjoy your coffee
- bags contain A1 and Brazil ground coffee
- A1 (80% Arabica / 20% Robusta) with strong, full, medium bitter taste with a pleasant aftertaste, suitable for milk treatments
- 100% Arabica Brazil Pergamino Sul de Minas has very well balanced delicate sweet taste with a slight acidity and a hint of chocolate and almonds
- packet includes 5 bags of Al coffee blend and 5 bags of 100% Arabica Brazil (marked with a stamp on the bag)

Weight: 10 g • 0.35 oz (bag) Coffee: A1 (80% Arabica / 20% Robusta), Brazil (100% Arabica)

BELT

C9091XX

for trousers with Rock&Lock smart buckle Do not use for climbing or work at heights!

Size: M/L, XL Width: 20 mm

SPEED BELT

Belt for trousers with Speed buckle for fast releasing. Width: 44 mm Size: M/L, XL Color: mixed colors Do not use for climbing or work at height! Color: black, khaki, various colors

KEY HOLDER

You will never lose your keys if you use Singing Rock key holders.

USB FLASH DRIVE

P0019XX00

Wooden flash drive to transport and store your personal files.

 small ring to connect it to your key holder or accessory cord.

Capacity: 8 GB Material: Eco Friendly wood

WRISTBAND

P0024XX00

100% latex-free silicone wristband with debossed Singing Rock. Made from premium high quality rubber.

TEXTILE BADGE

10x4 cm - P0031XX01 15x6 cm - P0031XX02

Singing Rock textile embroidered badge to be stitched to your clothing, backpack or bag. Size: 10 x 4 cm, 15 x 6 cm

PAPER BAG

P0033XX00 small - P0033XX02

P0054XX00

Eco-friendly paper bag rounded paper handle supports a respectful approach to the environment. Dimensions: 35x44x18 cm24x33x12 cm

BANNER BAG

There are many ways to save the environment. Like not leaving leftovers and not throwing away old stuff. That's the spirit behind this upcycle bag. It's made from old Singing Rock banners and has handles made from leftover ropes. When you get one, you give things that someone else would throw away a second life.

- bag made from old trade fair banners
- each piece is an original
- handles made from leftover ropes can be adjusted with any knot, factory made approx. 65 cm long
- hand wash the bag, rarely in the washing machine on gentle/sport programme (30 - 40°C), do not use fabric softener or dryer, the bag may not get a third chance
- made in the Czech Republic

Colour: various Weight: 300 g Material: used advertising banners, leftover ropes Dimensions: 38 x 43 x 10 cm

Volume: approx. 16 l

POLYGON TRAINING CENTRES SCAFFOLDS AND INDUSTRIAL HALLS FRAMING AND ROOFING FALL ARREST ROPE ACCESS LADDERS TREE CARE ROPE COURSES AND ADVENTURE PARKS WIND TURBINES CABLEWAY EVACUATION MILITARY AND SPECIAL FORCES

POLYGON

Over more than two decades on international markets, SINGING ROCK has become the world's leading manufacturer of Personal Protective Equipment (the "PPE"). In an effort to provide its customers with comprehensive services and solutions in the area of security of workers at height and above depth, SINGING ROCK was the first in the Czech Republic and former eastern Europe to build a completely unique multifunctional training center POLY-GON.

POLYGON facilities create the ideal conditions for providing occupational health and safety (the "OHS") training for work at height and above depth, for testing PPE, for organizing industrial climbing contests and many other events associated with presentation and use of products and techniques related to this area. A number of specific simulations allow visitors to test safely proper techniques of safeguarding when working at height. All this under the direct supervision of experienced trainers while using complete equipment for these activities. With individual approach, high quality equipment and great emphasis on the practical part, our trainings in POLYGON became sought after among individuals and companies not only in the Czech Republic.

SINGING ROCK is certified as IRATA training company.

SINGING ROCK is the first and so far the only company in the Czech Republic to become a member of the globally recognized association IRATA.

IRATA – Industrial Rope Access Trade Association – was founded in the UK in order to ensure a safe working environment for workers at height. In a quarter of century of its existence, IRATA has become a leading expert in the field of security in work at height, and in this field it is the only global association with many member organizations around the world.

Our operated IRATA courses therefore provide, in conjunction with our certificated POLY-GON training centers, a unique opportunity to obtain the best possible qualification for work at height and above depth. After successful completion of the training the participant receives an IRATA certificate, which is valid

around the world and which is required by some foreign entities as the only possible prerequisite to carry out work at height.

LIST OF SINGING ROCK POLYGON TRAINING CENTERS

POLYGON Poniklá Czech republic

Our first POLYGON is part of the SINGING ROCK headquarter and manufacturing factory in a picturesque valley of the Jizera river. It offers a number of model situations for work at height.

www.polygon-singingrock.com

POLYGON Kladno Czech republic

located in the former premises of Poldi Kladno – Konev. The former manufacturing building offers a real industrial environment to practice work situation when working at heights. www.polygon-singingrock.com

Polygo<mark>n Partner</mark> Brno Czech republic

Located in an industrial area in a former cement plant. Thanks to its height of more than 23m, it gives the opportunity to create a variety of model situations for work at height and rescue training.

www.klajda.cz/skoleni-prace -ve-vyskach-bozp

Polygon Partner Ostrava Czech Republic

Training centre situated in the unique historical industrial site where for more than 150 years thousands of miners used to mine a black coal. www.polygonhlubina.cz

Polygon Partner Karlovy Vary Czech republic

Until recently, the Karlovy Vary region, situated in the west of the Czech Republic, didn't have a proffesional training centre for work at height. It was changed in May 2019. Now, this new POLYGON parter offers high-quality services to all applicants from that part ouf our country.

Polygon Partner Stúpava Slovakia

The Slovak Polygon partner offers a very diverse range of health and safety training for work at heights. Especially for tree climbers, persons professionally qualified to perform periodic inspections for PPE and more.

www.polygony.sk

Polygo<mark>n Partner</mark> Navarra, Spain

Total HSE training centre is equipped with structures that simulate wind turbines, in order to offer true-to-life experiences in their courses. Except basic range of general work at height trainings can also provide GWO and IRATA courses. www.totalhse.com

Polygon Partner Amman, Jordan

Beit Jala Training Center is located in Amman, capital city of Jordan. Except basic range of general work at height trainings can also provide individual trainings in clients location. www.beitjala.com.jo

Polygo<mark>n Partner</mark> Medellín, Columbia

The first POLYGON partner in the American continent provides courses and training, which are specifically regulated for the entire Colombian territory and are part of the mandatory compliance with the Occupational Health and Safety Management System, as well as some at international level. Intervenes in the control and management of hazardous work activities.

www.deporteka.com.co

Polygon Partner Sofia Bulgaria

Training centre situated in Sofia is operated by PROFIXT Ltd, IRATA # 6026/T which has been providing work at heights trainings and IRATA trainings for over 10 years in Bulgaria and has certified more than 400 industrial rope access technicians by the standards of the international system of IRATA. www.profixt.com

Polygon Partner Xi´an China

Training center is located in Xi´an, Shaanxi province capital city with long history. Provide trainings mainly for fire-fighters and rescuers.

Polygon Partner Brasov Romania

This training centre is the first provider of training courses in work-at-height in the southeast of Europe. The centre is evolved through the volume of it's services, the number of technicians and most importantly through it's techniques in providing rope access services. www.e-solo.ro

BASIC SKILLS

Work at height

Workers at height are in permanent danger of falling from a height. That is why their safety should always come first. Worker's safety is achieved by using various methods for setting up a personal fall protection system. The structure of the fall protection system should always correspond with the type of activity considering high efficiency of work along with maximal possible safety.

FALL FACTOR

-

a

Vy=Vx

The impact force (IF) determines the maximum value of force generated during fall arrest of the object by the safety chain. The value of IP has a direct impact on the safety of worker at height. Ideally, we avoid IP if we reduce it to the lowest level possible (max 6kN)

When safeguarding an ascent using a fall arrest type "Y" it is necessary to move at the level FF1 and lower. It means that the connectors (EN362) connected to the fall absorber (EN355) during the ascent do not "fall" below the connection point of the harness (EN361) in which the absorber is connected to the harness.

ANCHORING

179

SCAFFOLDS AND INDUSTRIAL HALLS

Many people are injured each year when they fall from scaffolds. Scaffolds should be erected by trained and competent people. There are a number of organisations that provide training for the safe use of scaffolds. A scaffold is one way to prevent a fall when working at height. The type of scaffold selected must be suitable for the work and erected and dismantled by people who have been trained and are competent to do so. Those using tower scaffolds should also be trained in the potential dangers and precautions required during use. Tower scaffold provision and use must be properly managed and include rigorous scaffold inspection arrangements.

ROOFING

When moving on the roofs, there is always the risk of fall through or slip followed by a fall. To eliminate this risk it is necessary to set up sufficiently strong anchor point and to use proper PPE. If there is no sufficiently strong anchor point, it is necessary to use more anchor points together. The anchorage must be placed above the worker to prevent him/her from a fall. If there is a risk of falling, it is necessary to incorporate a fall absorber into the safety chain. Pay attention to the horizontal distance from the vertical of the anchor point. The bigger it is the more dangerous possible fall will be.

1,5 m Use of mobile safety system (fine line) to delimit safe working area.

RECOMMENDED GEAR

Services & Activities

TOWERS AND RIGGING

- Working on tall structures may involve fall arrest, work positioning, rope access and possibly evacuation.
- If no stable safety system is present and the structure needs to be climbed repeatedly a flexible fall arrest line may be required
- For climbing on the frame construction of metal towers fall absorber may be essential.
- Construction demands a full range of fall protection solutions to meet the needs of a dynamic workplace. That's why workers turn to SINGING ROCK for expertise, superior
- a aynamic workplace. That's why workers turn to Singing ROCK for expertise, superior quality products and continual systems innovation.

Some basic principles of using ropes and lanyards:

Keep your rope out of any sharp edges, rough surfaces and chemicals. Especially on slopes anticipate potential direction of fall and the strain of your rope. When working on constructions, pay attention to the direction of leading your rope and anticipate its possible strain. When using lanyards either to climb the construction or to positioning, take heed to reduce potential fall to minimum! Therefore always place the anchor point above the worker.

EN 358

EN 36

Fall absorbers:

When using a fall absorber, the elongation of the fall absorber during breaking action shall be considered. As there are different types of fall absorbers on the market, safe use of this product requires careful reading and understanding of instructions for use, where the method of calculation maximal possible elongation of fall absorber is stated. For your safety we recommend to add another 0.5 m to the calculated distance.

Services & Activities

ROPE ACCESS

Rope access is called "royal discipline" in working at height activities. This working method is fast, effective, has little effect on the workplace and it is very quick to install and dismantle. It is used for a wide variety of work: cleaning, painting, inspection and other working situations.

Rope access or industrial climbing is a form of work, which applies practical ropework to allow workers to access difficult-to-reach locations without the use of scaffolding, cradles or an aerial work platform. Rope access technicians descend, ascend, and traverse ropes for access and work while suspended by their harness. Sometimes a work seat may be used. The support of the rope is intended to eliminate the likelihood of a fall altogether, but a back--up fall arrest system is used in case of the unlikely failure of the primary means of support. This redundancy system is usually achieved by using two ropes - a working line and a safety line.

PERMANENT LIFELINES

Permanent lifelines serve to secure workers in places where it is possible to set up fixed anchor point in the working place or near it. These are then interconnected by steel rope or a rail. For moving and securing, the worker uses connectors (EN 362) or special slider made for this purpose and supplied by the system manufacturer. The advantage of permanent lifelines is their long operating life and variability of use.

Fall arrest systems form an important element of the safety chain. When used correctly, they ensure sufficient absorption of fall energy, thus preventing the worker's body from being damaged. If the worker faints during or after fall, it is necessary to transport him to a safe place. The long hanging of unconscious body may have fatal consequences (trauma caused by hanging). Therefore keep in mind that fall arrest systems should be only used by trained workers. In case of need they should be able to aid each other at rescue and recovery action.

TREE CARE

An arborist is a professional in the practice of arboriculture, which is the cultivation, management, and study of individual trees, shrubs, vines, and other perennial woody plants in dendrology and horticulture. Arborists generally focus on the health and safety of individual plants and trees, rather than managing forests or harvesting wood.

Arborists who climb can use a variety of techniques to ascend into the tree. The least invasive, and most popular technique used is to ascend on rope.

One of the most effective options of getting into the tree is setting up ascent ropes from the ground. It is done by throwing a light bag carrying a thin rope over the required anchor point. The ascent system is then pulled by this light rope. There are two common methods of climbing: Single Rope System (SRS) and Moving Rope System (MRS).

Prior to starting work, the arborist in the tree must always have two independent adjustable positioning devices.

ROPES COURSES AND ADVENTURE PARKS

Rope parks are a combination of climbing and professional activities. It is a leisure-time activity mainly carried out by people who are gaining the experience with climbing. This activity combines working as well as sport equipment. The person (client) is ideally dressed in a full body harness, connected to the steel rope with two connectors and these are connected to the harness by a textile sling or lanyard. In addition, the client is equipped with a tandem pulley, which is connected to the harness by a sling or lanyard.

Zip Line At zip line the client first attaches a tandem pulley to the steel rope, behind the pulley, client attaches the first and second back up sling with the connector. The whole weight of a client is in the pulley. Back up slings move freely behind the pulley.

> All the equipment used in the rope park must be checked every 12 months even if it is sports equipment.

Rope course elements are always divided by a platform, where client changes the connectors from a steel security rope to another one. The client always has to lock one security loop and the other security loop. It must never happen that both connectors are disconnected from the security steel rope at the same time. It is the same system as securing on via ferrata.

CABLEWAY EVACUATION

Ski lift or gondola evacuations utilize specialized rescue techniques and gear that must perform regardless of weather conditions.

The success of evacuation operations begins with having the proper ski lift or gondola evacuation gear and proper training and practice of the operating personnel.

If the chair lift or gondola fails, the person in charge must evacuate passengers according to the evacuation plan. Evacuation of a ski lift requires pecific techniques for movement along a cable. For maximum efficiency, these operations are led simultaneously by several independent teams.

Evacuation is a team effort and requires perfect coordination by everyone involved. SINGING ROCK team cooperates with ski resorts all over Czech Republic to improve rescue methods and develop a new gear.

Rock&Lock

Patented smart buckle used on SINGING ROCK hornesses and other products enables to lock and open very quickly.

Lody fit

Specially designed products for women.

Route 44

SINGING ROCK patented technology for rope production. A rope is produced on 44 carrier machine which provides great handling, low weight and durability.

Inter Core

The unique patented technology providing maximum safety even in case of a damaged sheath. The rope is made from 4 layers of parallel core filaments, braided core, braided intermediate sheath made from staple fibres and single tech sheath.

Single Tech

With the Single Tech system each strand is braided into the sheath separately. Single Tech sheath construction increases the rope's wear resistance and improves the rope's mechanical properties, such as flexibility.

Single rope

Marking of single dynamic rope for climbing and mountaineering used in single strand.

1/2

1

Half rope

Marking of half rope for mountaineering, multipitch and ice climbing, Individual strands of rope are used in alternation in the protection system. This system reduces the risk of rope breakage caused by falling stones, and provides maximum safety in alpine conditions and for difficult climbs.

Twinrope

Marking of twin ropes for mountaineering, multipitch and ice climbing. Pairs of the same type of rope are always used, sharing the same protection points. Twin ropes quarantee a high level of safety, especially for multipitch climbing in alpine conditions.

Stitched eye

sewn loop at the end of kernmentle low stretch rope used as a subsitute of a knot. Used mainly to attach ropes to anchor or attachment points.

UIAA

Products marked with this symbol meet strict UIAA safety requirements. The UIAA is the International Mountaineering and Climbing Federation. In most cases, UIAA requirements are sometimes stricter than EN standards.

ULAA Water repelent

A standard for water repellent ropes approved by the UIAA Safety Commission. To pass the test at a certified laboratory, the amount of absorbed water must not be greater than 5% of the rope's weight. For comparison, a non-treated rope absorbs around 50% of water in this test, and ropes labelled as "dry" but lacking adequate treatments can absorb between 20% and 40% of water.

CE Symbol of compliance

The CE symbol declares that the product is in compliance with the safety requirements of the applicable European standard. The number after the symbol CE(e.g. C€ 1019) identifies the relevant accredited testing lab.

American National Standards Institute - is a private non-profit organization that oversees the development of voluntary consensus standards for products, services, processes, systems, and personnel in the United States.[3] The organization also coordinates U.S. standards with international standards so that American products can be used worldwide.

NFPA

The National Fire Protection Association is a US nonprofit organization devoted to eliminating death, injury, property and economic loss due to fire, electrical and related hazards. It is widely known as an organization that creates and maintains standards and codes for usage and adoption by local governments.

ABS	
Aaryl	Acrylonitrile butadiene styrene is a common thermoplastic polymer. The most important mechanical properties of ABS are impact resistance and toughness. ABS is stronger than pure polystyrene. Lightweight, soft, and warm, with a wool-like feel fabrics or yarn. Strong and warm, acrylic fiber is often used for sweaters and tracksuits and as linings for boots and gloves, as well as in furnishing fabrics and
	carpets. It is manufactured as a filament, then cut into short staple lengths similar to wool hairs, and spun into yarm.
Anodizing	Electrolytic passivation process used to increase the thickness of the natural oxide layer on the surface of metal parts. Anodizing increases resistance to corrosion and wear, and provides better adhesion for paint primers and glues than bare metal does.
Bamboo	Cloth, yam, and clothing made out of bamboo fibres. Bamboo fabric is exceptionally soft and light. It is also incredibly hydrophilic, absorbing more water than other conventional fibres such as cotton and polyester.
Cold forging	Deformation of metal while it is below its recrystallization point. This process is usually less expensive than hot forging and the end product requires little, if any, finishing work. Residual stress of material may occur as it handles high stress and high die loads
Cardura	Brand name for a collection of fabrics used in a wide array of products including luggage, backpacks, trousers, military wear and performance apparel. Cordura fabrics are known for their durability and resistance to abrasions, tears and scuffs. Cordura fabrics are usually made of nylon.
Cortex	Polyamide ealstic woven fabrics. Cortex fabrics are designed to ensure the maximum ergonomy and comfort.
Dyneema	Registered trademark for a synthetic fabric that is stronger than Kevlar®. Dyneema® is composed of ultra high molecular weight polyethylene. It is resistant to water, most chemicals, UV radiation and bacterial.
ED coating	Electrophoretic deposition coating. A characteristic feature of this process is that colloidal particles suspended in a liquid medium migrate under the influence of an electric field (electrophoresis) and are deposited onto an electrode.
Elastane (Spandex)	Synthetic polyether-polyurea copolymer known for its exceptional elasticity. It is stronger and more durable than natural rubber.
EPS	Expanded polystyrene is a rigid and tough, closed-cell foam. It is made of pre-expanded polystyrene beads. Due to its technical properties such as low weight, rigidity, and formability, EPS can be used in a wide range of different applications.
Fiber glass	Type of fiber-reinforced plastic where the reinforcement fiber is specifically glass fiber. The glass fiber may be randomly arranged, flattened into a sheet (called a chopped strand mat), or woven into a fabric. Fiberglass is unique in its strength and yet it is lightweight. Although it is not as strong and stiff as composites based on carbon fiber, it is less brittle, and its raw materials are much cheaper.
Fleece	Soft napped insulating fabric made from a type of polyester called polyethylene terephthalate (PET) or other synthetic fibers. A lightweight, warm, soft and hydrofobic fabric. Regular polar fleece is not wind- proof and does not absorb moisture. It is readily generates static electricity.
G10 fiber	High-pressure fiberglass laminate, a kind of composite material. It is created by stacking multiple layers of glass cloth, soaking in epoxy resin, and compressing the resulting material under heat until the epoxy cures. GIO is favoured for its high strength, low moisture absorption, excellent electrical insulating properties and chemical resistance.
HF welding	Joining of materials by supplying High Frequency energy in the form of an electromagnetic field (27.12 MHz) and pressure to the material surfaces to be joined.
Hot forging	Deformation of metal while it is above the recrystallization point. Hot forging is recommended for the deformation of metal that features a high formability ratio. Hot forging provides a homorgenized grain structure
Injection	Manufacturing process for producing parts by injecting material into a mould. Material for the part is fed into a heated barrel, mixed, and forced into a mould cavity, where it cools and hardens to the configu- ration of the cavity.
Kemmantle rope	Rope constructed with its interior core protected by a woven exterior sheath designed to optimize strength, durability, and flexibility. The core fibers provide the tensile strength of the rope, while the sheath protects the core from abrasion during use.
Kevlar	Kevlar is the registered trademark for a para-aramid synthetic fiber. Kevlar has many applications, ranging from bicycle tires and racing sails to body armor, because of its high tensile strength-to-weight ratio by this measure it is 5 times stronger than steel. It is designed to protect users from cuts, abrasions and heat. Kevlar-based protective gear is often considerably lighter and thinner than equivalent gear made of more traditional materials.
Nylon	Generic designation for a family of synthetic polymers, based on aliphatic or semi-aromatic polyamides. Nylon is a thermoplastic silky material that can be melt-processed into fibers, films or shapes. Nylon is very much suitable for hosiery and the knitted fabrics because of its smoothness, light weight and high strength.
Polyamide (PA, PAD)	Macromolecule with repeating units linked by amide bonds. Synthetic polyamides are commonly used in textiles, automotive applications, carpets and sportswear due to their high durability and strength. Fibres are very tear-proof and abrasion-resistant and absorb little moisture (thus good transport of moisture away from the body) and are stretchy, crease-free, but also prone to pilling. Polyamide has the highest resistance of all textile raw materials (also when wet) and is very stretchy.
Polycarbonate	Group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent.
Polyester (PES)	Category of polymers that contain the ester functional group in their main chain. Fabrics woven or knitted from polyester thread or yarn are used extensively in apparel and home furnishings. Industrial polyes ter fibers, yarns and ropes are used in car tire reinforcements, fabrics for conveyor belts, safety belts, coated fabrics and plastic reinforcements with high-energy absorption. Polyester has excellent return conduct thanks to the rippling property and is very light. Polyester also retains its shape and is colourfast, as well as resistant to sweat and UV-rays (lightfast). Polyester has a high melting point and transfers can therefore be printed on this material)
Polyethylene (PE)	Most common plastic, which is usually a mixture of similar polymers of ethylene. Polyethylene is of low strength, hardness and rigidity, but has a high ductility and impact strength as well as low friction. It shows strong creep under persistent force, which can be reduced by addition of short fibers. Its primary use is in packaging (plastic bags, plastic films, geomembranes, containers including bottles, etc.)
POLYMAR	Registered trademark for a polyester coated with polyurethane tarpaulin fabric. It is UV and weatherproof resistant.
Polypropylene (PP)	Thermoplastic polymer used in a wide variety of applications including packaging and labeling, textiles (e.g., ropes, thermal underwear and carpets), stationery, plastic parts and reusable containers of various types, laboratory equipment, loudspeakers, automotive components and polymer banknotes. An addition polymer made from the monomer propylene, it is rugged and unusually resistant to many chemical solvents, bases and acids. Polypropylene is the world's second-most widely produced synthetic plastic, after polyethylene.
Poly styrene	Synthetic aromatic polymer made from the monomer styrene. Polystyrene can be solid or foamed. General-purpose polystyrene is clear, hard, and rather brittle. Polystyrene is one of the most widely used plastics. Uses include protective packaging (such as packing peanuts and CD and DVD cases), containers (such as "clamshells"), lids, bottles, trays, tumblers, and disposable cutlery.
Poly vinyl chloride (PVC)	World's third-most widely produced synthetic plastic polymer, after polyethylene and polypropylene. PVC comes in two basic forms: rigid and flexible. The rigid form of PVC is used in construction for pipe and in profile applications such as doors and windows. It is also used for bottles, other non-food packaging, and cards (such as bank or membership cards). In flexible form, it is used in plumbing, electrical cable insulation, imitation leather, signage, phonograph records, inflatable products, and many applications where it replaces rubber.
Poly urethane (PU)	Polymer composed of organic units joined by carbamate (urethane) links. While most polyurethanes are thermosetting polymers that do not melt when heated, thermoplastic polyurethanes are also available.
Ripstop	Woven fabrics, using a special reinforcing technique that makes them resistant to tearing and ripping. During weaving, (thick) reinforcement threads are intervoven at regular intervals in a crosshatch pattern. Advantages of ripstop are the favourable strength-to-weight ratio and that small tears can not easily spread.
Stainless Steel	Steel alloy with a minimum of 10.5% chromium content by mass. Stainless steel is notable for its corrosion resistance. Stainless steel does not readily corrode, rust or stain with water as ordinary steel does. However, it is not fully stain-proof in low-oxygen, high-salinity, or poor air-circulation environments.
Technora	Registered trademark for an aramid that is useful for a variety of applications that require high strength or chemical resistance. It is closely related to Kevlar (see Kevlar).
Thermolite	Synthetic material made by Invista and used as an insulator. The performance fibers are engineered with a differentiated fiber shape, able to produce battings with sought-after lightweight warmth.
Thermotransfer	Digital printing process in which material is applied to paper (or some other material) by melting a coating of ribbon so that it stays glued to the material on which the print is applied.
Ultrasonic finishing	Sound waves with frequencies higher than the upper audible limit of human hearing is joining the load-bearing core and the protective sheath into a compact unit. It is used to finish kernmantle ropes ends.
Velcro	Registered trademark for a hook-and-loop fastener, which consists of two components: typically, two lineal fabric strips (or, alternatively, round "dots" or squares) which are attached (sewn or otherwise adhered) to the opposing surfaces to be fastened.
Zinc plating	Prevents oxidation of the protected metal by forming a barrier and by acting as a sacrificial anode if this barrier is damaged.

absorbers. EN:358

THAT'S SINGING ROCK

Our company is located in the Czech Republic, in the heart of Europe. Our headquarter is near Krkonoše National Park and Bohemian Paradise where the amazing and unique sandstone rock climbing areas are situated. Most of our staff are climbers or workers at height, alpinists or backcountry skiers. All of us love the vertical playground. The great group of people who create the true SINGING ROCK culture is the priceless benefit for most of us who work at the company. We develop and manufacture gear for the vertical world as if it were for us. Most of the manufacturing is handmade and so thousands of finished products or their parts pass through our hands. Over the course of 30 years of SINGING ROCK, many people have taken turns at the machines and computers but some of them have been here almost from the beginning.

We are climbers who work for climbers

Warning:

Activities at height such as climbing, via ferrata, caving, rappelling, ski-touring, rescue, work at height and exploration are dangerous activities, which may lead to severe injury or even death. Thus the following is essential before use: careful reading and understanding of the instructions for use acquaintance with the possibilities and limitations of the product adequate apprenticeship in appropriate techniques and methods of use understanding and acceptance of the risk involved. In case of doubt or problem of understanding, contact SINGING ROCK.
